Disclosure Report
Date Submitted: April 9th, 2024

Disclosure Materials

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire that B Lab deems relevant for public stakeholders, then, as a condition of their certification, the company must:

- 1) Be transparent about details of the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue
- 3) Demonstrate that management practices are in place to avoid similar issues from arising in the future, when necessary.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit and integrity of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to a background check by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Other - Clients in Controversial Industries

Disclosure Questionnaire Statement	
Topic	Clients in Controversial Industries
Summary of Issue	Gravis is an investment manager that operates seven funds, one of which is the VT Gravis Clean Energy Income Fund which has exposure to multiple energy generation methods including natural gas power generation (2.7% of the Fund's portfolio based on installed capacity at 31 December 2023). The company's funds predominantly invest in companies and assets in non-controversial industries.
Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)	As of 31 December 2023, the VT Gravis Clean Energy Income Fund has an exposure of 2.7% based on installed capacity to natural gas power generation. This equates to 0.5% of the total assets under management of Gravis.
Impact on Stakeholders	<p>Companies that work with clients in controversial industries can indirectly increase the harmful impact to stakeholders by enabling business growth. Therefore, companies that work with clients in these industries should have practices in place to ensure that their impact is aimed at decreasing the negative impacts of the industry.</p> <p>B Lab has flagged the involvement of companies with clients in controversial industries as a material issue and new standards will be created to address possible risks related to this matter.</p>
Implemented Management Practices	<p>The VT Gravis Clean Energy Income Fund avoids companies with significant involvement in controversial industries like defense, alcohol, gambling, pornography, non-medical animal testing and tobacco (significant involvement is defined as greater than 5% of an investee's company's revenue).</p> <p>In the energy sector there remains a legacy of nuclear and fossil fuel power generation - for companies involved in multiple generation methods natural gas is deemed acceptable, whereas power generation from coal, oil and nuclear activities is deemed unacceptable.</p> <p>For an investment to be deemed suitable for the Fund, it must</p>

	<p>demonstrate a commitment to environmental improvements through policy, management systems or positive products. The company considers potential negative incidents and environmental controversies before an investment is made. Other social aspects like community impacts, labor rights, supply chain and modern slavery are also considered. Consideration is also given to governance issues like company ownership and control structure, remuneration of board members, taxation, corruption and bribery before selecting suitable investments.</p> <p>Gravis has a responsible investment statement for each fund which each fund must adhere to (refer to the document for the VT Gravis Clean Energy Income Fund linked below).</p>
<p>Report</p>	<p>Responsible Investment Statement Gravis Responsible Investment Policy</p>
<p>Management Comments</p>	<p>Whilst there is a small exposure to companies involved in natural gas power generation, where this exists it is worth highlighting the following:</p> <ul style="list-style-type: none"> - These natural gas power generation assets form part of a larger portfolio of power generation assets owned by a specific company. The Fund does not invest in companies where their asset base is solely (or primarily) comprised of gas power generation assets. The Fund’s overall exposure to natural gas power generation is therefore the aggregated exposure via a number of companies, all of which own these natural gas assets within a broader portfolio of assets skewed towards renewables. - Natural gas assets which the Fund is exposed to are typically (1) highly efficient combined cycle gas turbines or (2) combined heat and power plants (CHP), which have the benefit of capturing and using the thermal energy resulting from the combustion process. In the case of CHP, this type of efficient and decentralised power generation forms a key element of achieving energy efficiency improvements. - The companies through which natural gas exposure is obtained are typically not seeking to add or develop additional natural gas capacity (with the exception of those focused on energy efficiency rather than renewable power generation). Investment is focused on renewable forms of generation that dilute gas exposure within their asset base.
