

About Forestwise

Forestwise is a socio-environmental enterprise with a mission to **#StopDeforestation** and preserve the rainforest by creating **#RainforestValue**. We achieve this by developing a market for valuable products from the rainforest, thereby empowering local communities to protect the remaining rainforest.

At Forestwise, our vision is a future where every generation thrives alongside flourishing rainforests. Our mission is to protect and preserve rainforest land by wild harvesting and selling forest products, while empowering our local community: creating Rainforest Value.

In Borneo, nature’s wealth grows on trees, deep in its lush rainforests. Forestwise transforms these natural treasures into high-quality, sustainable ingredients for the food and cosmetic industries.

As the world’s leading supplier of Illipe Butter, a premium Cocoa Butter Equivalent (CBE), we work hand-in-hand with local communities to produce this exceptional product.

Our mission goes beyond Illipe Butter. We aim to create other valuable rainforest products like Arenga Sugar, Kukui Nut Oil, and Natural Rubber while developing traceable supply chains that drive local economic growth and preserve more land and forest in Borneo. By building a replicable, climate-smart agricultural business model, we aspire to empower communities and protect rainforests across Asia for generations to come.

Social & Environmental Impacts

In Borneo, deforestation is a serious challenge that threatens biodiversity and endangered animals and emits greenhouse gases affecting our climate. Wild collection of illipe nuts is a sustainable livelihood for local communities. Your commitment to this emerging nut butter will ensure production can thrive and keep forests not just standing but regenerating.

By using Illipe Butter, you are helping the local forest communities in Borneo preserve precious rainforests. To date, we can proudly showcase the positive outcomes below:

Preserve **40,000** hectares of rainforest

Empower **920** farmers collecting illipe nuts in **31** villages

Increase farmers' income by **16%**

Involve **women** farmers, with women and men ratio of **3:1**

Use **regenerative** agriculture practices

Our USPs

Forestwise rainforest products offer you the opportunity to create specialized, certified organic fair-trade solutions with meaningful impacts for your brand and the planet.

- **Natural Sourcing and Wild Harvested:** All products are naturally sourced and wild-harvested from Borneo's rainforests.
- **Fully Traceable Supply Chain:** Each product is fully traceable, ensuring transparency and accountability from source to end product.
- **Fully Certified:** Our products are certified Organic, COSMOS, FFL, USDA Organic, Halal, and we are a member of UEFT.
- **Social and Environmental Impact:** Directly supports local communities and rainforest preservation.
- **Health and Quality Benefits:** Enhances product quality with natural, plant-based ingredients that improve texture and stability, such as reducing fat blooming in chocolate.
