

Grain Blanc

Disclosure Report
Date Submitted: April 24th, 2023

Disclosure Materials

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire that B Lab deems relevant for public stakeholders, then, as a condition of their certification, the company must:

- 1) Be transparent about details of the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue
- 3) Demonstrate that management practices are in place to avoid similar issues from arising in the future, when necessary.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit and integrity of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to a background check by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Others - Clients in Controversial Industries

Topic	Clients in the Fossil Fuel Industry
Summary of Issue	Grain Blanc is a communications company aiming to support companies committed to creating a positive impact and has a client operating in the gas sector on an ongoing basis. The company serves customers by designing and producing communication media such as educational diagrams, illustrations, tables, diagrams, digital and printed presentation documents, films, video animations. The service supports the client's core business operations, to present actions in the field of sustainable development and CSR as well as the energy transition of its subsidiaries, in particular the development of renewable gasses such as biomethane and hydrogen from renewable energies such as wind and photovoltaic. The service provided as well as the fee structure is the same for companies in non-controversial as well as controversial industries.
Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)	In 2022, the client in the gas sector represented 30.9% of the company's revenue at the time, amounting to €73,608.
Impact on Stakeholders	Communications companies that work with clients in controversial industries may contribute to negative social and environmental impacts on society by promoting growth within the industry. B Lab has flagged the involvement of companies with clients in controversial industries as a material issue and new standards will be created to address possible risks related to this matter.
Implemented Management Practices	Grain Blanc supports all companies that engage in the ecological and solidarity transition from the moment their strategy and practices are solid and verifiable; including companies in sensitive sectors who would like to move away from it. However, the company favors companies outside these sectors and has diversified its portfolio so that companies operating in sensitive industries represent a lower proportion of its overall revenue.

	Grain Blanc has an ethics committee made up of shareholders and employees that audits clients and projects every year to check that they comply with the company's raison d'être, in favor of ecological transition and solidarity.
