

Stock CO2

Disclosure Report

Date Submitted: August 24th, 2023

Disclosure Materials

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire that B Lab deems relevant for public stakeholders, then, as a condition of their certification, the company must:

- 1) Be transparent about details of the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue
- 3) Demonstrate that management practices are in place to avoid similar issues from arising in the future, when necessary.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit and integrity of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to a background check by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

This document contains a copy of the company's completed Disclosure Questionnaire and related disclosure documentation provided by the company

Disclosure Questionnaire

Industries and Products

	Yes	No
Please indicate if the company is involved in production or trade in any of the following. Select Yes for all options that apply.		
Animal Products or Services	☐	☒
Biodiversity Impacts	☐	☐
Chemicals	☐	☒
Disclosure Alcohol	☐	☒
Disclosure Firearms Weapons	☐	☒
Disclosure Mining	☐	☒
Disclosure Pornography	☐	☒
Disclosure Tobacco	☐	☒
Energy and Emissions Intensive Industries	☐	☒
Fossil fuels Gambling	☐	☒
Genetically Modified Organisms	☐	☒

Negative Social Impact	☐	☒
Other	☐	☒

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Other Disclosure Industries

Topic	Clients in Controversial Industries
Summary of Issue	Stock CO2 is a carbon offsetting operator based in France that provides carbon credit products to companies. The company has had clients in the Alcohol, Nuclear Power and Water Utility Industries. Services to these clients have included the provision of carbon credits as well as the measurement of GHG emissions to reduce client carbon footprints.
Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)	In 2022, 12.79% of the company's revenue was derived from clients in the Alcohol Industry, 2.14% from clients in the Nuclear Power or Hazardous Materials Industry and 0.34% from the Water Utilities Industry.
Impact on Stakeholders	Companies that work with clients in controversial industries can indirectly increase the harmful impact to stakeholders by enabling business growth. Therefore, companies that work with clients in these industries should have practices in place to ensure that their impact is aimed at decreasing the negative impacts of the industry. B Lab has flagged the involvement of companies with clients in controversial industries as a material issue and new standards will be created to address possible risks related to this matter.
Implemented Management Practices	Stock CO2 intends to continue working with clients in these industries with the exact service, products and business model. They do not currently have a position with regards to working with clients in controversial industries. Stock CO2 is developing carbon offset projects under the "Label Bas-Carbone". This French state framework regulates the possible communications of companies offsetting their emissions by supporting these projects. Stock CO2's customers cannot engage in greenwashing through their carbon contributions as these are public and displayed on the website of the Ministry of Ecological Transition. In addition, since January 2023 France has implemented decree no. 2022-539 of 13 April 2022 on carbon offsetting and carbon neutrality claims in advertising, which provides a framework for and penalises companies making misleading and greenwashing statements.

Report	French decree no. 2022-539 French Label -Bas- Carbone
