

Café William Spartivento Inc.

Disclosure Report

Date Submitted: January 4th, 2024

Disclosure Materials

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire that B Lab deems relevant for public stakeholders, then, as a condition of their certification, the company must:

- Be transparent about details of the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue
- 3) Demonstrate that management practices are in place to avoid similar issues from arising in the future, when necessary.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit and integrity of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to a background check by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

This document contains a copy of the company's completed Disclosure Questionnaire and related disclosure documentation provided by the company

Negative Social Impact		\checkmark
Other		\checkmark

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Environmentally Intensive Industries

Issue Date	Ongoing
Topic	Energy and Emissions Intensive Industries
Summary of Issue	Café William Spartivento Inc., as a coffee roasting company, operates in a sector known for its high energy requirements. The primary energy source used in their operations is natural gas, which powers the roasters.
Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)	Approximately around 73% of the company's revenue in 2022 was generated from roasted coffee products. Café William's current emission intensity is 6 tons of CO ₂ e per millions of canadian dollar and 0.11kg of CO ₂ e per kg of coffee.
Impact on Stakeholders	Energy intensive manufacturing activities, such as coffee roasting, pose an environmental risk due to the emissions produced by such energy use. The extent of environmental impact is dependent on the energy sources utilised and management practices in place to manage energy use.
Implemented Management Practices	Café William Spartivento Inc. has implemented several management practices to address the environmental impact of their coffee roasting operations. They transitioned to an electric roasting process in a new factory in early 2024, moving away from natural gas. A new state of the art roaster has been purchased and the company foresees a consumption of 50% less energy than before. In addition, the company is introducing a product line with reduced carbon emissions involving sustainable transportation methods, Fairtrade-organic coffee and electric roasting.

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Environmentally Intensive Industries

Issue Date	Ongoing
Topic	Biodiversity Impact
Summary of Issue	Café William Spartivento Inc., as a coffee roasting company, acknowledges the significant biodiversity impacts associated with coffee cultivation. As Café William Spartivento Inc. has many coffee suppliers, they rely on the standards of Rain Forest Alliance (RFA) and Fairtrade (FT) to be sure to mitigate the risk on biodiversity related to the coffee they buy.
Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)	Approximately 73% of the company's revenue is generated from roasted coffee products and around 65% of their total expenses are from the purchase of green coffee (through brokers and companies). From the total green coffee purchases, 28% is Rain Forest Alliance (RFA) certified, while 8% is Fairtrade (FT) certified.
Impact on Stakeholders	Agricultural production can have a negative impact on the environment and local biodiversity if impacts are not properly managed, especially for crops that are grown under monoculture.
Implemented Management Practices	Café William Spartivento Inc. has taken steps to mitigate biodiversity risks. They have a significant portion of their green coffee purchases certified by Rain Forest Alliance (RFA) and Fairtrade (FT) that prevent deforestation and promote biodiversity through validation of good practices on the farm as well as support for continuous improvement. Additionally, the company focuses on reducing chemical usage, with a move towards organic certification to minimize chemical inputs. Management actively measures their impact on biodiversity through the percentage of certified green coffee and the premium paid to suppliers for sustainable practices. Their objective is to increase the proportion of certified green beans to over 90% (either RFA or FT certified or both), recognized by the global coffee platform.
