Disclosure Report

Date Submitted: June 25th, 2024

Disclosure Materials

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire that B Lab deems relevant for public stakeholders, then, as a condition of their certification, the company must:

- 1) Be transparent about details of the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue
- 3) Demonstrate that management practices are in place to avoid similar issues from arising in the future, when necessary.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit and integrity of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to a background check by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

B Lab's Public Complaints Process

Any party may submit a complaint about a current B Corp through [B Lab's Public Complaint Process](#). Grounds for complaint include:

- 1) Intentional misrepresentation of practices, policies, and/or claimed outcomes during the company's [certification process](#)
- 2) Breaches of the B Corp Community's core values as expressed in our [Declaration of Interdependence](#)

This document contains a copy of the company's completed Disclosure Questionnaire and related disclosure documentation provided by the company.

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Facilities located in sensitive ecosystems

Topic	Company has two boreholes in and a factory located adjacent to the Harrild Natur Område region in Denmark.
Summary of Issue	<p>The water withdrawn comes from next to a region called Harrild Natur Område, an area protected by the European Union's The Nature Directives and Natura 2000 and by the Danish government. For more information please refer to the following links to the description of the area, definition of Natura 2000, and governmental plans for the area:</p> <p>https://naturstyrelsen.dk/find-et-naturomraade/naturguider/soehoejlandet-og-oestjylland/harrild-hede-og-noerlund-plantage</p> <p>https://www.eea.europa.eu/themes/biodiversity/natura-2000/the-natura-2000-protected-areas-network</p> <p>https://mst.dk/media/lcgl2a1/n75-natura-2000-plan-2022-27-harrild-hede-olvemosen-og-heder-i-noerlund-plantage.pdf</p>
Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)	<p>The nearest Natura 2000 site is located approximately 170 meters East of the well. The company's factory is located outside of this area.</p>
Impact on Stakeholders	<p>Ikast-Brande Municipality has conducted a screening according to the Environmental Assessment Act 2 and has assessed that the extraction of water will not have a significant impact on existing ecosystems and their surroundings.</p> <p>License to extract groundwater from well DGU no. 95.2730</p>
Management Practices	<p>The license for the source concluded no risks. However, in line with European Regulations, Danone (the company's parent) is implementing a global programme to assess and mitigate biodiversity risks in its own operations and beyond, including Aqua d'Or.</p>

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Energy and Emissions Intensive industry

Aqua d'Or Mineral Water A/S is involved in the production and sale of bottled water products, or is part of an industry that can potentially be classified as energy and emission-intensive, meaning that they are more likely to have significant impacts on the environment based on their carbon emissions associated with their operations and their contribution to climate change. Aqua d'Or Mineral Water A/S acknowledges its potential negative environmental impact and actively works to mitigate its impact.

As per B Lab's rules, manufacturing companies in the food & beverage industry are required to make transparent their involvement in such activities or industries, irrespective of their actual intensity or impact.

Aqua d'Or Mineral Water A/S is a legal entity of Danone SA. As such, it is fully in line with the group's ambition to help lead an industry-wide transition to a low-carbon economy. In 2015, Danone started engaging in climate change following the Paris Agreement. The company published the Climate Policy and set 1.5° reduction targets for 2030, officially approved by SBTi in 2022. Danone's main contributor to the carbon footprint is milk, which accounts for 36% of the overall emissions. Energy and industrial operations account only for 5% of the total. Nevertheless, Danone commits to reducing emissions through strategic programs and has a global ambition in line with the Science-Based Targets initiative and committing to net zero emissions by 2050.

More information can be found [here](#).

Energy & Emissions are also a key topic of the company sustainability strategy, Danone Impact Journey. Danone's global targets on climate are:

- Reduce its GHG footprint by 2030, in line with what science says is required to limit warming 1.5°C
- Achieve 30% reduction in methane emissions from fresh milk by 2030
- 30% improvement in energy efficiency by 2025
- Achieve net Zero emissions by 2050

As part of the strategies to reach the Danone Impact Journey targets listed above, Danone launched a Global Energy Excellence Program, Re-Fuel Danone in 2022, as an action plan to reduce energy and industrial emissions and transform the energy footprint of its production sites worldwide. The global targets are:

- Improve energy efficiency by 30% by 2025

- Significantly increase its use of renewable energy, such as biogas, biomass, solar and hydrogen
- 100% of electricity will be from renewable sources, and half of all energy will come from renewable sources by 2030
- Reduce the company's scope 1 & 2 emissions by a minimum of 42% by 2030

To monitor its progress, Danone uses an internal reporting tool for sustainability metrics – Greentrack - deployed in each Business Unit worldwide, including Aqua d'Or Mineral Water A/S to track energy consumption and efficiency.

For more details on practices and quantitative data for Aqua D'Or Mineral Water A/S, please refer to the Transparent Assessment.
