

DISCLOSURE MATERIALS

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire and B Lab deems them to be material, the company must:

- 1) Be transparent about the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue.
- 3) Demonstrate that management systems are in place to avoid similar issues from arising in the future.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to background checks by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

This document contains a copy of the company's completed Disclosure Questionnaire and related disclosure documentation provided by the company.

B Corp Certification - Disclosure Questionnaire Documentation

PROVIDED BY: W-Agency UPDATED AS OF: 05/02/2023

DISCLOSURE QUESTIONNAIRE CATEGORY	Disclosure Industries
ТОРІС	Clients in Controversial Industries
SUMMARY OF ISSUE	W-Agency is a CSR service and sustainability consultancy offering 3 main services: Support along the B Corp Certification process, CO2 programs with measurement, reduction & offsetting plans and ESG and CSR strategy consulting services. The company has had one client operating in the Pharmaceutical industry over the last 5 years. The service offered and the price structure of the company's service is the same for companies in controversial industry as non-controversial industries.
SIZE/SCOPE OF ISSUE (e.g. \$ financial implication, # of individuals affected)	Clients operating in the Pharmaceutical industry represented 2.4% of the company's revenue in 2021 and 2.4% in 2022.
IMPACT ON STAKEHOLDERS	Companies that work with clients in controversial industries can indirectly increase the harmful impact to stakeholders by enabling business growth. Therefore, companies that work with clients in these industries should have practices in place to ensure that their impact is aimed at decreasing the negative impacts of the industry. B Lab has flagged the involvement of companies with clients in controversial industries as a
	material issue and new standards will be created to address possible risks related to this matter.
IMPLEMENTED MGT PRACTICES	W-Agency is committed to conducting business with companies with which it shares values and ethics. It has a formal policy on conducting business with controversial industries and a code of Ethics. Before engaging with a company they first assess their business practices using a disclosure questionnaire based on the B Impact Assessment Disclosure Questionnaire (link below). In addition, a background search is conducted to identify any links with controversial industries or scandals.
	Client business practices are monitored once the company has decided to work with them.
