

DISCLOSURE MATERIALS

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire and B Lab deems them to be material, the company must:

- 1) Be transparent about the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue.
- 3) Demonstrate that management systems are in place to avoid similar issues from arising in the future.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to background checks by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

This document contains a copy of the company's completed Disclosure Questionnaire and related disclosure documentation provided by the company.

B Corp Certification - Disclosure Questionnaire Documentation

PROVIDED BY: Dr. Bronner's UPDATED AS OF: August 24 2022

DISCLOSURE QUESTIONNAIRE CATEGORY	Cannabis Related Products
TOPIC	Industrial hemp seed oil
SUMMARY OF ISSUE	Dr. Bronner's sells cosmetic products that contain a small amount of industrial hemp seed oil.
SIZE/SCOPE OF ISSUE (e.g. \$ financial implication, # of individuals affected)	In the previous fiscal year, 60% of Dr. Bronner's product lines contained industrial hemp seed oil as a minor ingredient. Those product lines accounted for 90% of the company's sales.
IMPACT ON STAKEHOLDERS	Cannabis-related products are subject to controversy both because of their current and historic legal status around the world, as well as concerns about the potential harm that the products may cause. Current regulations governing the legality of cannabis-derived products are complex and vary widely by local jurisdiction. Dr. Bronner's uses industrial hemp seed oil as a minor ingredient addition in all of their soaps due to its unsurpassed essential fatty acid content. Hemp seed oil makes the soaps less drying, yields a smoother lather, and is also an excellent moisturizer in lotions and balms. Industrial hemp seed oil is pressed from the unshelled whole seeds of industrial hemp. In industrial hemp, THC is present only in trace amounts in the flowers and leaves of the plant - not the seeds from which the hemp seed oil is pressed. The U.S. Federal Government, under the Farm Bill Sec. 7606, defines industrial hemp as, "Cannabis sativa L. and any part of such plant, whether growing or not, with a delta-9 tetrahydrocannabinol concentration of not more than 0.3 percent on a dry weight basis." Trace, insignificant amounts of THC may be found in hemp seed oil if there was trace resin from the flowers still on the hemp seeds when they were pressed into oil.
IMPLEMENTED MGT PRACTICES	Dr. Bronner's currently sources organic hemp seed oil from suppliers within the United States and requires a Certificate of Analysis (COA) from all suppliers to validate that each batch of material tested within the acceptable U.S. Federal Government limits for THC before it is accepted for use in production. Dr. Bronner's samples incoming raw materials and verifies test results claimed on COAs at their discretion. Per supplier COAs on file and independent laboratory test results, none of the material Dr. Bronner's received has demonstrated trace THC above Dr. Bronner's internal quality limits of 10 parts per million (ppm) or the U.S. Federal Government's acceptable limits.
