

DISCLOSURE MATERIALS

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire and B Lab deems them to be material, the company must:

- 1) Be transparent about the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue.
- 3) Demonstrate that management systems are in place to avoid similar issues from arising in the future.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to background checks by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

This document contains a copy of the company's completed Disclosure Questionnaire and related disclosure documentation provided by the company.

DISCLOSURE QUESTIONNAIRE

Company Name: Terrasos SOS
 Date Submitted: 09/15/2021

Industries & Products	Yes	No
Please indicate if the company is involved in production of or trade in any the following. Select Yes for all options that apply.

B Corp Certification - Disclosure Questionnaire Documentation

PROVIDED BY:

Terrasos SOS

UPDATED AS OF:

09/15/2021

DISCLOSURE QUESTIONNAIRE CATEGORY	Clients involved in mining.
ISSUE DATE	Ongoing
TOPIC	In the past five years, the company has worked with three different mining companies.
SUMMARY OF ISSUE	In 2020, the company completed a project with a coal mining company in Colombia. They are currently working with two other gold mining companies on similar projects, both in Colombia. Both projects were focused on managing the client's social/community impact, by providing environmental consulting services and environmental projects and investments, so that companies can offset their impacts.
SIZE/SCOPE OF ISSUE (e.g. \$ financial implication, # of individuals affected)	These projects represented ~15% of the company's revenue in FY 2020.
IMPACT ON STAKEHOLDERS	While coal and gold mining is recognised as a controversial industry due to its environmental impact as well social risks related to labor and community impact, Terrasos' services to clients in this sector have all been focused on assessing and managing its clients' social impact.
IMPLEMENTED MGT PRACTICES	The company conducts negotiations with companies that have links or activities of dubious reputation, where demonstrable and concrete evidence is evident, these are avoided. A reputational study process (due diligence) is carried out, taking into account the information obtained from different sources, including: the controller's office, attorney general's office, police, OPAC and Inpec. A study is made about the possible negative news that may arise about the third party that is being analyzed and the practices it performs. All information is recorded in a matrix. Terrasos always reviews the environmental and social standards of their clients and choose to work with companies that have best practices in place.
OTHER MGT COMMENTS	Terrasos is a company specialized in the structuring and operation of environmental investments. We work with companies in the regulated sector with investment obligations and / or environmental compensation and our activity is based on the principle that sustainable development implies a balance between the economic, social and environmental functionality of the territory. We work with public and private entities in the design and implementation of natural resource management and sustainability strategies. Terrasos works on several fronts to seek that investments derived from environmental obligations have a positive and lasting impact on the territory from an economic, environmental and social point of view.
