

Kimai

Disclosure Report

Date Submitted: August 10th, 2023

Disclosure Materials

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire that B Lab deems relevant for public stakeholders, then, as a condition of their certification, the company must:

- 1) Be transparent about details of the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue
- 3) Demonstrate that management practices are in place to avoid similar issues from arising in the future, when necessary.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit and integrity of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to a background check by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

This document contains a copy of the company's completed Disclosure Questionnaire and related disclosure documentation provided by the company

Disclosure Questionnaire

Industries and Products

	Yes	No
Please indicate if the company is involved in production or trade in any of the following. Select Yes for all options that apply.		
Animal Products or Services	☐	☒
Biodiversity Impacts	☐	☒
Chemicals	☐	☒
Disclosure Alcohol	☐	☒
Disclosure Firearms Weapons	☐	☒
Disclosure Mining	☐	☒
Disclosure Pornography	☐	☒
Disclosure Tobacco	☐	☒
Energy and Emissions Intensive Industries	☐	☒
Fossil fuels Gambling	☐	☒
Genetically Modified Organisms	☐	☒
Illegal Products or Subject to Phase Out	☐	☒
Industries at Risk of Human Rights Violations	☒	☐

Business in Conflict Zones	☐	☒
Child or Forced Labor	☐	☒
Negative Environmental Impact	☐	☒
Negative Social Impact	☐	☒
Other	☐	☒

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Industries at risk for human rights violations

Topic	Company sources metal precious and diamonds
Summary of Issue	Kimai is a jewelry retailer and manufacturer whose products utilize precious metals and diamonds. These raw materials could be considered conflict minerals and pose a potential human rights risk.
Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)	Approximately 20% of the company's Cost of Goods Sold comes from gold that would be considered a high risk for human rights violations.
Impact on Stakeholders	The use of precious metals and gemstones poses a human rights risk due to the possibility that they are sourced from conflict-affected and high risk areas, where they may be used to finance conflict and/or be associated with human rights abuses in the supply chain.
Implemented Management Practices	Kimai only uses lab-grown diamonds in its jewelry and 100% of its gold is recycled. Approximately 80% of all the gold the company sourced in 2022 was from suppliers in compliance with the Fairtrade standards. The company has a questionnaire applicable to all its suppliers to understand what are the environmental and social impacts of their supply chain. Kimai gives preference to working with either local, small, independent businesses that Kimai can visit or larger suppliers with environmental certifications.
