Disclosure Report

Date Submitted: August 29th, 2023

Disclosure Materials

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire that B Lab deems relevant for public stakeholders, then, as a condition of their certification, the company must:

- 1) Be transparent about details of the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue
- 3) Demonstrate that management practices are in place to avoid similar issues from arising in the future, when necessary.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit and integrity of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to a background check by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Fossil Fuels

Topic	Company retails fossil fuels
Summary of Issue	Maganetti owns a LNG/CNG station to serve the geographical area where it operates. LNG is the least polluting fuel for heavy trucks available today. It is a retail location but for pre-authorized commercial operators (trucks and vans).
Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)	Maganetti Spedizioni spa earns 3% of revenues from the sale of fossil fuels.
Impact on Stakeholders	The geographical area most affected by this kind of environmental output is the local community where Maganetti operates (Valtellina region).
Implemented Management Practices	Through this activity, Maganetti is actually already contributing to the reduction of negative environmental impacts related to the logistics sector, helping to build an infrastructure that allows the company and also its competitors to choose the least polluting fuel in this market. Maganetti is also implementing a conversion plan on the total owned fleet and on part of its affiliated fleet in order to reduce pollution (less CO ₂ , less PM _x).
Management Comments	The LNG station is already a step up from the classic diesel station but the aim is to get to the bioLNG

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Environmentally Intensive Industries

Topic	Energy and emissions intensive industry
Summary of Issue	As an industrial transport service provider, Maganetti Spedizioni provides road transport services, which are mainly based on the use of diesel. Therefore, the company operates in an industry in which energy and carbon emissions are material environmental issues.
Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)	<p>The company reported that it earned 100% of its last annual revenue from road transportation services.</p> <p>The main contribution to the company's emission of greenhouse gases is within its scope, which represents 100% of the total inventory. The company's assessed GHG emissions for [d] were 24.898 Co2/Kg for the year 2022</p>
Impact on Stakeholders	Energy and emissions intensive industries contribute to air pollution and climate change. B Lab recognised the haulage and refrigerated storage industries as an energy intensive that will require the creation of additional risk standards through a standards development process.
Implemented Management Practices	<p>In order to reduce the negative impacts associated with its carbon emissions, the company reported the following practices</p> <ul style="list-style-type: none"> • As a less polluting replacement proposal, the company has activated a specific methane distributor for heavy vehicles (LNG) which until 2021 first operated exclusively and then mainly with fossil methane, • Since 2022 following a biofuel project, the company has operated the distributor almost exclusively on biomethane, • The company plans to open a second station in 2023, which will include both biomethane and fossil methane and, probably, HVO as a replacement fuel for diesel.
