

We are the impact partner strengthening communities with data services to actualize their own interests, values, and priorities.

Collaborative, accurate, and useful data—because we know that true representation is impossible without it. Our goal is always self-determination for the communities we serve. Through community-led research, evaluation, strategy, implementation, and creative services, Sweet Grass builds data systems that genuinely reflect communities' lifeways and values.

**SWEET GRASS**  
CONSULTING

**Data  
services  
that build  
capacity  
and deliver  
impact**

## Research

### **Transformative approaches for lasting impact**

We collaborate closely with clients to devise strategies for addressing their informational gaps, aligning goals with their mission and vision from the outset. Employing a diverse set of methods, including surveys, interviews, financial analysis, interactive focus groups, and spatial-asset mapping, we strive for efficiency and minimal invasiveness to ensure active participation from local individuals and organizations throughout the entire research process.

## Evaluation

### **Driving positive change through partnerships**

To meet the demand for impactful assessment, we help clients establish processes for data collection, storage, and analysis. Our services include developing theories of change and logic models, creating data tools, and implementing tracking systems. We collaborate throughout the entire analysis, interpretation, and reporting phases to ensure a thorough understanding of an organization's impacts, enhancing its efficiency and success.

## Creative Services

### **Using visual communication to align vision and mission**

Our designs speak directly to the lived experiences and aspirations of our clients. Using the power of visuals, we convey key information and insights, making complex data more engaging and actionable. By creating visually compelling and cohesive brand designs, we effectively communicate an organization's services and impact to a wide range of stakeholders to facilitate knowledge sharing and foster decision-making.

## Strategy

### **Holistic planning for growth and sustainability**

We focus on enhancing processes, procedures, and services for our clients, covering areas such as employee and project management, work planning, software utilization, and client mapping. Remaining adaptable, documenting lessons learned, and implementing a systems-based approach to organizational change, we leverage our technical expertise and use community-rooted solutions for organizational growth and long-term sustainability.

## Implementation

### **Tailored solutions for enhanced data management**

We provide fully customizable database solutions within an impact tracking structure, empowering organizations to showcase their contributions while enhancing data management. Through customization, cultural sensitivity, and technological flexibility, we help navigate data intricacies and address organizational shifts. With personalized training and extensive experience, we ensure sustainable capacity-building tailored to each organization's needs.
