Disclosure Report

Date Submitted: December 13th, 2023

Disclosure Materials

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire that B Lab deems relevant for public stakeholders, then, as a condition of their certification, the company must:

- 1) Be transparent about details of the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue
- 3) Demonstrate that management practices are in place to avoid similar issues from arising in the future, when necessary.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit and integrity of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to a background check by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

Impact on Stakeholders	<p>Companies that work with clients in controversial industries can indirectly increase the harmful impact to stakeholders by enabling business growth. Therefore, companies that work with clients in these industries should have practices in place to ensure that their impact is aimed at decreasing the negative impacts of the industry.</p> <p>B Lab has flagged the involvement of companies with clients in controversial industries as a material issue and new standards will be created to address possible risks related to this matter.</p>
Implemented Management Practices	Vox Pops International indicates that many of the projects carried out for clients in controversial industries have aimed to generate a positive social or environmental outcome. Although the company does not have a formal position statement in relation to working with clients from controversial industries nor a formal evaluation process, it indicates that potential clients are evaluated against the company's morals, and the company

	<p>would turn down work with companies that do not align to these morals. Any prospective client or project which may be controversial in any way would be thoroughly discussed by the management team before deciding and proceeding. The company has also ensured employees working on these projects feel comfortable with working on the respective subject matter.</p> <p>Within their Client and Employee Charters the company commits to be environmentally and socially conscious in all decisions they make and to operate their company responsibly, working towards B Corp Certification by 2023 and Carbon Neutrality by 2024.</p>
