Disclosure Report

Date Submitted: May 24th, 2024

Disclosure Materials

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire that B Lab deems relevant for public stakeholders, then, as a condition of their certification, the company must:

- 1) Be transparent about details of the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue
- 3) Demonstrate that management practices are in place to avoid similar issues from arising in the future, when necessary.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit and integrity of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to a background check by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Facilities located in sensitive ecosystems

Topic	Rogue Creamery is a cheese manufacturing company with a production facility adjacent to sensitive ecosystems.
Summary of Issue	<p>The company has its dairy facility along the Rogue River that contains wetlands and riparian areas. This ecosystem area is protected by the Oregon Department of State Lands.</p> <p>Wetlands are considered sensitive ecosystems that provide the world with natural storm barriers, environmental cleansers, and food and water resources for many forms of life.</p>
Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)	Between 1%-5% of the company's production occurs in a facility adjacent to the Rogue River wetlands area.
Impact on Stakeholders	<p>Having facilities near protected/sensitive ecosystems can potentially impact the flora, fauna and quality of the ecosystem (e.g. noise & light pollution from the facilities, spills, air / soil / water pollution owing to the company's operations).</p> <p>The primary potential risk as a result of Rogue Creamery operations include microbial load from organic fertilizing runoff.</p>
Implemented Management Practices	<p>Rogue Creamery's main area of operation has an average of 300 feet away from wetlands and the river. The company maintains 6.6 acres by the river for wetland habitat to avoid any potential runoff into the river. The minimum requirements are an average of 75 feet from the river.</p> <p>The company's cheese products are Certified Organic by Oregon Tilth to the USDA Organic Regulations, which assures that the process meets the organic standards and does not use pesticides that could alter the ecosystem.</p> <p>The company complies with all local regulations and has specific procedures for employees and suppliers operating in sensitive ecosystems.</p>
