

Suministros del Norte

Disclosure Report

Date Submitted: October 13th, 2023

Disclosure Materials

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire that B Lab deems relevant for public stakeholders, then, as a condition of their certification, the company must:

- 1) Be transparent about details of the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue
- 3) Demonstrate that management practices are in place to avoid similar issues from arising in the future, when necessary.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit and integrity of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to a background check by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

This document contains a copy of the company's completed Disclosure Questionnaire and related disclosure documentation provided by the company

Disclosure Questionnaire

Industries and Products

	Yes	No
Please indicate if the company is involved in production or trade in any of the following. Select Yes for all options that apply.		
Animal Products or Services	☐	☒
Biodiversity Impacts	☐	☒
Chemicals	☐	☒
Disclosure Alcohol	☐	☒

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Other - Clients in Controversial Industries

Topic	Clients in Controversial Industries
Summary of Issue	Suministros del Norte (Sudelnor) is a Chilean company which commercializes products directed mainly towards the mining and industrial sectors; specializing in providing homologous alternatives of products that are difficult to access in the national or international market. The company sources its products through local suppliers or through direct imports from international suppliers. The company serves clients in the mining industry on an on-going basis, selling maintenance materials, pump machines, valves, as well as replacement parts for piping and pumping machinery (among others). Products sold by Suministros del Norte also serve clients in non-controversial industries, such as construction.
Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)	Suministros del Norte has had 2 clients operating in the mining industry in FY2022, representing a total of 18,9% of the company's revenue.
Impact on Stakeholders	Companies that work with clients in controversial industries can indirectly increase the harmful impact to stakeholders by enabling business growth. Therefore, companies that work with clients in these industries should have practices in place to ensure that their impact is aimed at decreasing the negative impacts of the industry. B Lab has flagged the involvement of companies with clients in controversial industries as a material issue and new standards will be created to address possible risks related to this matter.
Implemented Management Practices	The company offers solutions that play a fundamental role in mitigating the damage caused by the industry. In their commitment to this cause, they have adopted the initiative of not marketing any type of input, material, machinery or product that has harmful consequences for health or the environment. In accordance with their mission, they not only strive to satisfy the needs of our customers through personalized, highly specialized and professional attention, focusing on product

	quality, logistics and traceability. They also aspire to be an exemplary organization in terms of environmental responsibility and commitment to sustainability. Their initiative goes beyond simply offering services; They strive to be agents of positive change, actively promoting sustainable development in our environment.
