Disclosure Report

Date Submitted: July 1st, 2025

Disclosure Materials

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire that B Lab deems relevant for public stakeholders, then, as a condition of their certification, the company must:

- 1) Be transparent about details of the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue
- 3) Demonstrate that management practices are in place to avoid similar issues from arising in the future, when necessary.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit and integrity of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to a background check by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

B Lab's Public Complaints Process

Any party may submit a complaint about a current B Corp through [B Lab's Public Complaint Process](#). Grounds for complaint include:

- 1) Intentional misrepresentation of practices, policies, and/or claimed outcomes during the company's [certification process](#)
- 2) Breaches of the B Corp Community's core values as expressed in our [Declaration of Interdependence](#)

This document contains a copy of the company's completed Disclosure Questionnaire and related disclosure documentation provided by the company.

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Fossil Fuels

| Topic | Fossil Fuel Usage in Aviation |
|---|--|
| Summary of Issue | Heritage Aviation operates in the aircraft industry and engages in the sale of aviation fuel along with their aircraft maintenance and avionics services. |
| Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected) | In the last fiscal year, 38.8% of the company's revenues were from the sale of aviation fuel. |
| Impact on Stakeholders | <p>Fossil Fuel usage has a significant impact on air pollution. Fossil fuels can cause acid rain, eutrophication (excessive nutrients that can harm aquatic ecosystems by lowering oxygen levels), damage to crops and forests, and harm to wildlife. Fossil fuels can also cause water pollution from oil spills to fracking fluids.</p> <p>By its next recertification cycle, Heritage Aviation will be required to comply with all applicable requirements in effect at that time.</p> |
| Resolution | Heritage Aviation undertook an initiative to identify its carbon reduction objectives, which now guide both its short- and long-term priorities. The company continues to monitor its carbon footprint and achieved a reduction of 56.8 metric tons (CO ₂ e) from 2022 to 2023. Specifically, its Scope 1 and 2 emissions decreased from 924.7 to 867.9 metric tons (CO ₂ e). When factoring in carbon offsets, the total footprint was reduced to 135.6 metric tons (CO ₂ e). Heritage Aviation remains committed to measuring its emissions and plans to include Scope 3 emissions in its 2024 reporting. Through a combination of internal reduction strategies and offsets, the company aims to achieve net zero emissions by the end of 2027. Additionally, as part of its sustainability efforts in aviation fuel sales, Heritage Aviation transitioned to Avfuel, a supplier recognized for its leadership in sustainability and its offering of sustainable aviation fuel (SAF), a non-fossil fuel alternative. |
| Implemented Management Practices | Heritage Aviation continues to take a proactive approach toward minimizing its environmental impact and adopting new technologies to reduce its carbon footprint. Notable progress |

In addition to fuel innovation, Heritage Aviation is collaborating with BETA Technologies electric aircraft manufacturer based on the same airfield provide charging infrastructure for electric aircraft and vehicles as these technologies become commercially viable. Furthermore, the company has initiated early-stage discussions with a local solar energy firm, also a tenant, to explore options for expanding on-site solar capacity.
