- Siding

Forest Stewardship Council®
certified since 2008

LOCAL WOOD FOR THE GREATER GOOD

SUSTAINABLE NORTHWEST WOOD is the bridge between responsible forestry, beautiful local wood products and the built environment. We make it easy to find the Good Wood and can help you meet the sustainability goals for your project, whether you are building a garden box or a green building, an ADU or an international airport.

WE BELIEVE it is not only possible, but also vital, to protect and restore ecosystems, to salvage and upcycle wood from the waste stream, and create economic opportunities right here in the Pacific Northwest while supplying the wood our community needs.

OUR VALUES: As the trusted source for people who want to Build with Purpose, we use our business as a tool to positively impact the world around us. This can only be accomplished by recognizing that people and their environment are inextricably linked, and it is impossible to uplift one without also caretaking the other. By embracing continuous learning, the growth of our business brings us closer to fulfilling its deeper purpose.

OUR MISSION is to foster a wood products community where each purchase for the built environment helps ensure resilience in the natural one.

GOOD WOOD is climate-smart, provides clean air & clean water, protects wildlife habitat, and supports local families and small businesses. Our entire product offering is sourced from restoration projects, salvaged from the waste stream, or certified by the Forest Stewardship Council® (FSC® CO41262) and meets the requirements of LEED & Living Building Challenge projects.

Contact us to talk about your project and see what's possible with Sustainable Northwest Wood.

BUILD WITH PURPOSE
