Disclosure Report
Date Submitted: August 1st, 2024

Disclosure Materials

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire that B Lab deems relevant for public stakeholders, then, as a condition of their certification, the company must:

- 1) Be transparent about details of the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue
- 3) Demonstrate that management practices are in place to avoid similar issues from arising in the future, when necessary.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit and integrity of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to a background check by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

B Lab's Public Complaints Process

Any party may submit a complaint about a current B Corp through [B Lab's Public Complaint Process](#). Grounds for complaint include:

- 1) Intentional misrepresentation of practices, policies, and/or claimed outcomes during the company's [certification process](#)
- 2) Breaches of the B Corp Community's core values as expressed in our [Declaration of Interdependence](#)

This document contains a copy of the company's completed Disclosure Questionnaire and related disclosure documentation provided by the company.

Disclosure Questionnaire

Industries and Products

	Yes	No
Please indicate if the company is involved in production or trade in any of the following. Select Yes for all options that apply.		
Animal Products or Services	☐	☒
Biodiversity Impacts	☐	☒
Chemicals	☐	☒
Disclosure Alcohol	☐	☒
Disclosure Firearms Weapons	☐	☒
Disclosure Mining	☐	☒
Disclosure Pornography	☐	☒
Disclosure Tobacco	☐	☒
Energy and Emissions Intensive Industries	☐	☒
Fossil fuels Gambling	☐	☒
Genetically Modified Organisms	☐	☒
Illegal Products or Subject to Phase Out	☐	☒
Industries at Risk of Human Rights Violations	☐	☒

Business in Conflict Zones	☐	☒
Child or Forced Labor	☐	☒
Negative Environmental Impact	☐	☒
Negative Social Impact	☐	☒
Other	☐	☒

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Others - Disclosure Industries

Topic	Marketing of Breastmilk Substitutes
Summary of Issue	Erdbär GmbH offers complementary baby food which is recommended for babies from 5 months old. The glasses can be fed in addition to breastfeeding, particularly in the transition from breastfeeding to start feeding baby food. They conquer the toddler food segment and accompany kids from the age of 1 to 6 years.
Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)	In the fiscal year end of 2022, the company had generated 28,6% of its total annual revenue from baby and toddler food.
Impact on Stakeholders	The marketing practices of companies involved in the production and sale of breastmilk substitutes, defined by the WHO as products for infants aged 36 months and under, are controversial because of the risk that certain marketing practices may create an undue influence on a mother's choice to breastfeed, which could in turn negatively impact the health of infants. Companies involved in the marketing of breastmilk substitutes are eligible for B Corp Certification if they meet additional requirements.
Implemented Management Practices	The company was already certified by the time the BMS risk standards were updated and applicable to them. Erdbär was given one recertification cycle to meet B Lab's Marketing of Breastmilk Substitutes requirements .
