

CARBONO3 LLC

Disclosure Report Date Submitted: July 26th, 2024

© B Lab 2024

Disclosure Materials

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire that B Lab deems relevant for public stakeholders, then, as a condition of their certification, the company must:

- Be transparent about details of the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue
- 3) Demonstrate that management practices are in place to avoid similar issues from arising in the future, when necessary.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit and integrity of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to a background check by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

B Lab's Public Complaints Process

Any party may submit a complaint about a current B Corp through B Lab's Public Complaint Process. Grounds for complaint include:

- Intentional misrepresentation of practices, policies, and/or claimed outcomes during the company's certification process
- 2) Breaches of the B Corp Community's core values as expressed in our Declaration of Interdependence

This document contains a copy of the company's completed Disclosure Questionnaire and related disclosure documentation provided by the company.

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Others - Disclosure Industries

Topic	Clients in Controversial Industries and has investments exposure in controversial industries
Summary of Issue	CARBONO3 LLC is a firm focused on providing investment related consulting services and technical support.
	The company has a client in the Pharmaceutical industry and also has investments in the client's company. The services provided to the client relates to financial advisory services such as fundraising strategy, use of funds, capitalization structure, investment negotiation & finance-related support services such as accounting supervision and recommendations, audit process support and cash flow management.
Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)	As of 2024, CARBONO3 has invested 25% of the total investment value in the pharmaceutical client, which represents an estimated 2.5% of the company's revenue. CARBONO3 has not generated any direct revenue through its financial services provided.
Impact on Stakeholders	Companies that work with clients in controversial industries can indirectly increase the harmful impact to stakeholders by enabling business growth. Therefore, companies that work with clients in these industries should have practices in place to ensure that their impact is aimed at decreasing the negative impacts of the industry.
	The management of investments in controversial industries may contribute to the growth potential and returns for investors in these industries, which could contribute to specific risks and negative impacts related to customers, investors, communities and the environment that these companies can cause.
	B Lab has flagged the involvement of companies with clients in controversial industries as a material issue and new standards will be created to address possible risks related to this matter.
Implemented Management Practices	CARBONO3 does not have a formal position on working with sensitive industries or a policy to move away from them.

	As the company's mission is to have a positive impact in the society, if they believe any prospective/current client of theirs are doing something against the advancement of the <u>Sustainable Development Goals</u> as set by the United Nations, the company would not proceed with providing its services to them.
Management Comments	"We provide financial advisory services to multiple companies, but for this specific case, we do provide the advisory service at no cost because when we helped structuring the investment, Carbono3 invested a minor portion and we are providing the services free of charge until the company can raise additional funds and pay someone else (or us) to do these services. As of today, we have helped 2 companies set investment vehicles where Carbono3 participated as an investor too, although it is not our core business to invest."
