## Disclosure Materials

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire that B Lab deems relevant for public stakeholders, then, as a condition of their certification, the company must:

- 1) Be transparent about details of the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue
- 3) Demonstrate that management practices are in place to avoid similar issues from arising in the future, when necessary.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit and integrity of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to a background check by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

# Disclosure Questionnaire Statement

## Disclosure Questionnaire Category: Other - Clients in Controversial Industries

<b>Topic</b>	Clients in Controversial Industries
<b>Summary of Issue</b>	<p>Aderco International SA is a Swiss-based company with 40 years of experience in the design and formulation of fuel treatment solutions. The company has clients in the fossil fuels and mining industries, which are considered <a href="#">controversial by B Lab</a>.</p> <p>The products sold by Aderco are 100% vegetal-organic fuel treatment technology (additives) to the maritime &amp; inland sector.</p> <p>The company has submitted independent studies and tests to demonstrate the following statements regarding its products's environmental impact (reference to the company's inland operations):</p> <ul style="list-style-type: none"><li>- Aderco's fuel conditioners optimise fuel combustion by allowing for a more complete combustion. Their technology improves efficiency, maximise uptime and reduce carbon monoxide emissions, as well as limiting the negative impact of hydrocarbons and catalytic fines. Thus, Aderco-conditioned fuel burns cleaner, resulting in less air pollution, and in prolonging engine parts lifespan by reducing wear and tear.</li><li>- In addition, Aderco improves thermal efficiency, allowing ships to travel longer distances with less fuel, reducing greenhouse gas emissions, and helps to conserve resources.</li></ul> <p>Aderco-conditioned fuel also burns cleaner, resulting in less air pollution, and prolongs the life of engine parts by reducing wear and tear, leading to a lower carbon footprint</p>
<b>Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)</b>	In 2022, 4.43% of the company's total revenue was derived from a client in the fossil fuel and 9% from the mining industry.
<b>Impact on Stakeholders</b>	<p>Companies that work with clients in controversial industries can indirectly increase the harmful impact to stakeholders by enabling business growth. Therefore, companies that work with clients in these industries should have practices in place to ensure that their impact is aimed at decreasing the negative impacts of the industry.</p> <p>B Lab has flagged the involvement of companies with clients in</p>

	controversial industries as a material issue and new standards will be created to address possible risks related to this matter.
<b>Implemented Management Practices</b>	<ul style="list-style-type: none"><li>- To guarantee the quality of its services, Aderco International decided to implement a quality management system that meets the requirements laid down by the ISO 9001:2015 standard,</li><li>- The company has obtained the ISO 14001 certification,</li><li>- Aderco has been progressively walking away from the fossil fuel industry by constantly investing in biofuel research since 2015. Such research has shown promising results regarding Aderco's products' application on biofuels,</li><li>- The company supports clients to move away from the fossil fuel industry by easing the use of biofuels,</li><li>- Aderco has a due diligence questionnaire applicable to its distributors and agents. It covers issues the following issues: (i) partners' regulatory or legal proceedings (ii) potential matters regarding corruption, facilitation payments, or fraud, (iii) operations with high-risk countries, and (iv) certifications.</li><li>- The company's product is non-hazardous.</li></ul>
