

SPIN COLOMBIA SAS

Disclosure Report

Date Submitted: July 16th, 2026

Disclosure Materials

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire that B Lab deems relevant for public stakeholders, then, as a condition of their certification, the company must:

- 1) Be transparent about details of the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue
- 3) Demonstrate that management practices are in place to avoid similar issues from arising in the future, when necessary.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit and integrity of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to a background check by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

B Lab's Public Complaints Process

Any party may submit a complaint about a current B Corp through [B Lab's Public Complaint Process](#). Grounds for complaint include:

- 1) Intentional misrepresentation of practices, policies, and/or claimed outcomes during the company's [certification process](#)
- 2) Breaches of the B Corp Community's core values as expressed in our [Declaration of Interdependence](#)

This document contains a copy of the company's completed Disclosure Questionnaire and related disclosure documentation provided by the company.

Disclosure Questionnaire

Industries and Products

	Yes	No
Please indicate if the company is involved in production or trade in any of the following. Select Yes for all options that apply.		
Animal Products or Services	☒	☐
Biodiversity Impacts	☐	☒
Chemicals	☐	☒
Disclosure Alcohol	☐	☒
Disclosure Firearms Weapons	☐	☒
Disclosure Mining	☐	☒
Disclosure Pornography	☐	☒
Disclosure Tobacco	☐	☒
Energy and Emissions Intensive Industries	☐	☒
Fossil fuels Gambling	☐	☒
Genetically Modified Organisms	☐	☒
Illegal Products or Subject to Phase Out	☐	☒
Industries at Risk of Human Rights Violations	☐	☒

Negative Social Impact	☐	☒
Other	☐	☒

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Animal Products and Services

SPIN COLOMBIA SAS is involved in the production or sale of animal products and services, meaning that they are more likely to have significant impacts on the environment and animal welfare. Certified B Corps are required to make transparent their involvement in such industries.

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Animal Testing

Topic	Company's products are required to undergo mandatory animal testing by law
Summary of Issue	SPIN Colombia markets and distributes animal nutrition additives, supplements, and solutions for livestock (cattle, poultry, swine, among others). The products that the company markets are developed by its suppliers and due to health regulations and to validate their efficacy and safety, require animal testing prior to marketing. These tests are conducted by the manufacturers in their countries of origin, not directly by the company.
Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)	100% of the company's products undergo animal testing.
Impact on Stakeholders	Animal testing and experimentation is widely used to develop new agricultural products and to test the safety of other products. Many of these experiments can cause pain to the animals involved or reduce their quality of life in other ways.
Implemented Management Practices	The company has a publicly available Animal Welfare Policy that outlines its commitment to animal welfare and responsible research practices. The policy requires that any animal studies associated with the company's products, whether conducted by the company, its partners, or third parties, adhere to recognized animal welfare principles, including applicable legal and regulatory requirements. Animal testing is not conducted directly by the company. Where animal studies are required to support product development, safety, or efficacy, such testing is carried out by the company's suppliers or other third-party partners — which may include well-respected universities with their own ethics committees. These universities, as with other third-party partners engaged by suppliers, are expected to comply with applicable animal welfare standards and strive to reduce the number of animals required and minimize invasive sampling methods.
