

TechForGood

Certified

Corporation

We Help B Corps Stay B Corps

B Corp recertification is getting **tougher**. TechForGood is a Certified B Corp and Verified Responsible Supplier — triple-certified and audit-ready, so every ICT purchase helps you protect and strengthen your B Impact score.

Certified B Corporation® | Certified Social Enterprise (Social Traders) | Certified Carbon Neutral (NetNada)

How Your ICT Supplier Impacts Your B Impact Assessment

Working with a Verified Responsible Supplier saves time, reduces audit risk, and strengthens your score.

Unverified Supplier

Verified Responsible Supplier (TechForGood)

Governance

- ✗ You spend time chasing policies, data, and claims that may not withstand B Lab audit. There's no verified evidence their practices align with B Corp standards.

- ✓ **Certified B Corp.** Our verified status means we already meet the governance, ethics, and accountability standards your organisation is assessed against.

Workers

- ✗ No measurable contribution to fair work, equity, or inclusion in your supply chain in the Workers Section of your response.

- ✓ Every engagement supports **Priority Jobseeker employment pathways**. This strengthens your Workers section response.

Community

- ✗ Supplier spend doesn't qualify as Community impact in your B Impact Assessment.

- ✓ As **certified social enterprise and Certified B Corp**, your ICT spend with us counts directly towards your Community Section.

Environment

- ✗ Limited evidence of responsible disposal or emissions data. Green claims are often unverified and add complexity to your Environment reporting.

- ✓ **Certified Carbon Neutral supplier** with ISO-certified recycling through **Recover-E**. This counts directly towards your environment section response.

Customers

- ✗ Hard to demonstrate customer and stakeholder impact when suppliers provide no verified data.

- ✓ We provide **audit-ready, triple-certified assurance** making it easier to evidence stakeholder benefit in your Customers section.

“

B Corps save time and gain confidence when they work with Verified Responsible Suppliers.

With TechForGood, your ICT spend comes pre-verified — lowering admin, eliminating risk, and strengthening your certification story.

The TechForGood Difference

- ✗ More admin. Weaker evidence. Lost time at recertification.
- ✓ Stronger BIA scores. Audit-ready compliance data. Less effort for you — across your entire ICT stack, not just hardware.

Why Work With Us

We're a Certified B Corp — your Verified Responsible Supplier, strengthening every area of your BIA.

Governance

Triple-certified: **B Corp, Social Enterprise, and Carbon Neutral** — giving you verified, audit-ready suppliers by default.

Environment

Sustainable ICT. Certified Carbon Neutral supplier. 306.47 tCO₂-e neutralised and ISO-certified Recover-E recycling.

Workers

Inclusive Employer.

Employment pathways for Priority Jobseekers embedded in every engagement.

Customers

Values-aligned by design.

Your ICT supply chain demonstrates measurable impact for your own stakeholders.

Community

Social Impact through Catalysing Connections.

132,000 Human Connections delivered in FY25, on track for 1 million by 2030.

All ICT Covered

Hardware, cloud, software, services, and secure recycling — one verified supplier, one seamless process.

✓ No greenwashing

✓ No purpose premium

✓ No jargon

Just good local people, helping organisations buy technology in ways that create better outcomes for people and planet.

We help B Corps stay B Corps

Every ICT invoice with TechForGood strengthens your certification story, while creating real, measurable impact.
