Disclosure Report

Date Submitted: January 15th, 2024

Disclosure Materials

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire that B Lab deems relevant for public stakeholders, then, as a condition of their certification, the company must:

- 1) Be transparent about details of the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue
- 3) Demonstrate that management practices are in place to avoid similar issues from arising in the future, when necessary.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit and integrity of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to a background check by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Facilities located in sensitive ecosystems

Topic	Company's farm is located adjacent to Afonydd Cleddau Special Conservation Area in the UK.
Summary of Issue	The company's farm borders 20% of the protected habitat close to the river Cleddau. There is a natural buffer zone of woodland which helps with any water runoff.
Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)	20% of the company's farm is adjacent to protected areas.
Impact on Stakeholders	<p>Having farms near catchment and conservation areas can pose several risks to the environment, water quality, and biodiversity. Here are some of the key concerns associated with agriculture in proximity to these sensitive areas:</p> <ul style="list-style-type: none">- Water Pollution- Soil Erosion- Loss of Biodiversity- Invasive Species Spread- Water Scarcity- Disruption of Ecological Processes- Habitat Degradation- Climate Change Impact
Implemented Management Practices	<p>There is a natural buffer zone of woodland which helps with any water runoff. The company plant trees and reinstate the pond with the plan to reduce water runoff into the brook and reduce nutrients entering the water.</p> <p>The company is mindful of unnecessary vehicle use in wet weather as again this can lead to leaching nutrients into the water systems.</p> <p>Livestock do not have direct access to the river and are in rotational grazing. The company will continue to work with environmental agencies to help protect the areas where it is based.</p>
