## Disclosure Materials

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire that B Lab deems relevant for public stakeholders, then, as a condition of their certification, the company must:

- 1) Be transparent about details of the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue
- 3) Demonstrate that management practices are in place to avoid similar issues from arising in the future, when necessary.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit and integrity of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to a background check by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

# Disclosure Questionnaire Statement

## Disclosure Questionnaire Category: Other - Clients in Controversial Industries

<b>Topic</b>	Clients in Controversial Industries
<b>Summary of Issue</b>	<p>Granular Energy is a technology based firm providing software tools related to clean energy management solutions for utilities, energy managers, traders, and large energy buyers worldwide.</p> <p>The company has had clients in the Fossil-Fuel (includes coal/oil sands and non- coal/oil sands), Nuclear Power or Hazardous Materials and Water Utilities, industries which are deemed controversial by B Lab. The services provided to these is providing them with a SaaS platform to allocate electricity generated to electricity consumed in order to provide reporting to end consumers on the origin of their electricity.</p> <p>The service and product provided are mainly targeted at electricity retailers (also called energy suppliers). Some of these companies are branches of oil and gas companies or subsidiaries of Water Utility companies and some are companies involved in operating nuclear power stations.</p>
<b>Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)</b>	<p>In the fiscal year end of 2023, the company had generated 1% of total revenue from clients in the fossil-fuel (coal/oil sands) industry, 23% of total revenue from clients in the fossil-fuel (non coal/oil sands) industry and 20% of total revenue from clients in the water utilities industry. No revenue was made from clients in the Nuclear Power or Hazardous Materials industry as only a free pilot project was conducted with them. A paid project with them could happen in the future.</p>
<b>Impact on Stakeholders</b>	<p>Companies that work with clients in controversial industries can indirectly increase the harmful impact to stakeholders by enabling business growth. Therefore, companies that work with clients in these industries should have practices in place to ensure that their impact is aimed at decreasing the negative impacts of the industry.</p> <p>B Lab has flagged the involvement of companies with clients in controversial industries as a material issue and new standards will be created to address possible risks related to this matter.</p>
<b>Implemented</b>	Granular Energy does not have a specific position on working

<b>Management Practices</b>	<p>with sensitive industries or a policy to move away from them.</p> <p>The software tool provided by the company is solely used to create and manage green electricity offers and avoid potential greenwashing by providing additional transparency on the origin of electricity to their customers, including hourly matching between consumption and generation.</p> <p>When working with a new customer, the company has added a step in its sales process to fill a form to get approval from executives if the client is from a controversial industry. The sales team needs to justify in the form why they consider it OK to work with the company (e.g. they would be only helping the renewable branch of an oil &amp; gas company to grow).</p>
