Disclosure Report

Date Submitted: August 20th, 2024

Disclosure Materials

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire that B Lab deems relevant for public stakeholders, then, as a condition of their certification, the company must:

- 1) Be transparent about details of the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue
- 3) Demonstrate that management practices are in place to avoid similar issues from arising in the future, when necessary.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit and integrity of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to a background check by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

B Lab's Public Complaints Process

Any party may submit a complaint about a current B Corp through [B Lab's Public Complaint Process](#). Grounds for complaint include:

- 1) Intentional misrepresentation of practices, policies, and/or claimed outcomes during the company's [certification process](#)
- 2) Breaches of the B Corp Community's core values as expressed in our [Declaration of Interdependence](#)

This document contains a copy of the company's completed Disclosure Questionnaire and related disclosure documentation provided by the company.

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Operations located in Conflict Zones

Topic	Company has suppliers located in Conflict Zones
Summary of Issue	<p>Metta Muse, located in Switzerland, is a business-to-business online end-to-end sourcing platform that curates a network of artisans from around the world, specializing in areas such as weaving, hand embroidery, knitting, metalwork, and ceramics. Among several other products, the company sources products directly, Tier 1, from grassroots artisans in the Srinagar region and surrounding areas of Kashmir and sells these products through its business unit pink maharani, part of the parent company metta muse. The company chooses to work with these artisans because of their heritage-driven skills in cashmere weaving and embroidery, which have been passed down through generations in this region.</p> <p>The Kashmir region is a conflict zone, with the conflict originating from the 1947 partition of British India, leading to territorial disputes between countries, resulting in multiple wars and ongoing tension driven by religious and nationalist divides.</p>
Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)	During the fiscal year 2023, around 70% of the company's revenues came from products originating from conflict zones sourced for ist business unit pink maharani.
Impact on Stakeholders	<p>Business activities located in conflict zones are considered high-risk as they are more likely to cause or contribute to the conflict and/or sociopolitical instability.</p> <p>Countries classified as conflict zones are more likely to have a weak rule-of-law or a corrupt judicial system, which could undermine the effectiveness of operational grievance mechanisms for these businesses and their suppliers. In addition, the safety of the company's workers and other potential human rights violations are at risk.</p>
Implemented Management Practices	Metta Muse has a direct business agreement with an artisan group made up of individuals in need of economic empowerment in the Srinagar region and surrounding areas of Kashmir. The agreement includes a code of conduct that establishes policies such as no child labor, no forced labor or

	discrimination, business transparency, and health and safety, among others. Additionally, the company provides design upskilling workshops to the artisans and carries out yearly in-person audits.
Management Comments	Metta muse chooses to do business in Kashmir because of the rich heritage it holds in its craftsmanship and on the same hand the decreased opportunity to secure long term livelihood. We believe the artisans in such conflict regions need extended support for livelihood which is the company's main focus that can positively uplift such communities. The company does not contribute to the ongoing conflict in any form or activity which is rather politically driven. On the contrary, through increased economic opportunity the company would like to enable the local population to find its voice needed to rise against injustice and feel empowered to defend themselves through increased resources and increased community knowledge through access to education and regular income. There has been no recorded evidence that the company contributes to the conflict in this zone.
