Who we are:

A 100% employee-owned small business supporting both government and private sector field operations. We have over 24 years experience supporting research & technical projects in polar, desert, and tropical environments.

Our experience:

Our employees have decades of experience operating field sites, maintaining facilities & equipment, and providing technical support services in production and R&D capacities.

Our goal:

PFS seeks to be the go-to provider for clients who have support needs in places not everyone operates. We also strive to ply our expertise in ways that better the planet and those who inhabit it.

Our reputation:

Our company culture attracts seasoned outdoor professionals and skilled technicians and tradespeople who deliver outstanding support to our clients.
