

DISCLOSURE MATERIALS

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire and B Lab deems them to be material, the company must:

- 1) Be transparent about the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue.
- 3) Demonstrate that management systems are in place to avoid similar issues from arising in the future.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to background checks by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

This document contains a copy of the company's completed Disclosure Questionnaire and related disclosure documentation provided by the company.

DISCLOSURE QUESTIONNAIRE

Company Name: Cervejaria FIL
 Date Submitted: 9/22/2021

Industries & Products	Yes	No
Please indicate if the company is involved in production of or trade in any the following. Select Yes for all options that apply.		
Animal Products or Services		✓
Biodiversity Impacts		✓
Chemicals		✓
Company Explanation Of Disclosure Item Flags		✓
Disclosure Alcohol	✓	
Disclosure Firearms Weapons		✓
Disclosure Mining		✓
Disclosure Pornography		✓
Disclosure Tobacco		✓
Energy and Emissions Intensive Industries		✓
Fossil fuels		✓
Gambling		✓
Genetically Modified Organisms		✓

Other	✓	

B Corp Certification - Disclosure Questionnaire Documentation

PROVIDED BY:

Cervejaria FIL

UPDATED AS OF:

9/22/2021

DISCLOSURE QUESTIONNAIRE CATEGORY	Environmentally Intensive Industries
TOPIC	Water Intensive Industries
SUMMARY OF ISSUE	As a brewery, Cervejaria Fil operates in an industry that is water intensive.
SIZE/SCOPE OF ISSUE (e.g. \$ financial implication, # of individuals affected)	In the previous fiscal year, 100% of Cervejaria Fil's revenue was earned from the sale of alcohol
IMPACT ON STAKEHOLDERS	As a water intensive industry, brewing poses risks such as water stress or depletion of local water sources if water use is not appropriately managed. Cervejaria Fil uses water from an artesan well, and approved by responsible Government bodies. Usage does not affect other stakeholders
IMPLEMENTED MGT PRACTICES	In order to minimize the use of water in the process, Cervejaria Fil measures water consumption and has targets per batch produced. The company starts a new production only when at least 2 batches need to be produced in order that they may use the same water used in the first process, in the second. This leads to a reduction of water usage by 24%. Since small businesses of the size of Cervejaria Fil do not present information open to the public on water consumption and use, the company compares its usage with the amount used by large breweries (reported by globo.com), which is similar to the company's consumption. The company reuses all process water for irrigation such that all water consumption is utilized in more than 1 process. Cervejaria Fil reuses all the water from the cooling process. After boiling the beer wort, Cervejaria Fil cools down the output to a temperature of 20 degrees Celsius, by utilizing plate machinery for heat exchange and use less water in the process.
