

# **Score Aggregation Methodology & Brand List**

## **Ecotone 2025**

As the B Corporation Certification is a company-level certification, the assessment of a Parent Company is required to include its subsidiaries in which it owns >50% of the shares and has a controlling interest. Depending on the operations of the certifying company, Parent Companies may roll up their subsidiaries into a single assessment or assess separately.

Regardless of whether a Certified Parent Company's subsidiaries are assessed together or separately, only distinct subsidiaries that B Lab has determined independently meet the performance requirement for certification (i.e. score of 80+ points) are eligible to use the Certified B Corporation logo and refer to themselves as Certified B Corporations.

### **Aggregated Scoring Methodology**

**Brands**

Profile will say that Ecotone is a certified B Corp.

Brands that are not distinct operating subsidiaries included in the Parent Company's certification are not Certified B Corporations themselves but may use the Certified B Corporation logo if B Lab has determined they have independently met the performance requirement for certification. Otherwise, the Certified B Corporation logo shall only be used in reference to the brand as part of the Parent Company's certification.

For a list of brands under Ecotone that have been determined to have met the performance standards for certification (i.e. score of 80+ points) independently and can therefore use the B Corp IP, see below:
