

Delphi/GLOBE Series

Disclosure Report

Date Submitted: September 12th, 2025

Disclosure Materials

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire that B Lab deems relevant for public stakeholders, then, as a condition of their certification, the company must:

- 1) Be transparent about details of the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue
- 3) Demonstrate that management practices are in place to avoid similar issues from arising in the future, when necessary.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit and integrity of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to a background check by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

This document contains a copy of the company's completed Disclosure Questionnaire and related disclosure documentation provided by the company

Disclosure Questionnaire

Industries and Products

	Yes	No
Please indicate if the company is involved in production of or trade in any of the following. Select Yes for all options that apply.		
Animal Products or Services	☐	☒
Biodiversity Impacts	☐	☒
Chemicals	☐	☒
Disclosure Alcohol	☐	☒
Disclosure Firearms Weapons	☐	☒
Disclosure Mining	☐	☒
Disclosure Pornography	☐	☒
Disclosure Tobacco	☐	☒
Energy and Emissions Intensive Industries	☐	☒
Gambling	☐	☒
Genetically Modified Organisms	☐	☒

Negative Social Impact	☐	☒
Other	☐	☒

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Other - Clients in Controversial and Ineligible Industries

Topic	Clients in Controversial and Ineligible Industries
Summary of Issue	Delphi/GLOBE Series has clients in the following industries: Fossil Fuels, Mining, and Nuclear Power The types of services/products offered to these clients include: - sustainability consulting, sustainability reporting, net-zero and target-setting, stakeholder engagement and facilitation, and innovation and clean technology consulting.
Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)	In the last fiscal year, 3.68% of the company's annual revenue was from clients in Fossil Fuels In the past, the company has also worked with clients in other controversial industries, including: Mining and Nuclear Power.
Impact on Stakeholder(s)	Companies that work with clients in controversial industries can directly or indirectly increase the harmful impact to stakeholders by enabling business growth. Therefore, companies that work with clients in these industries should have practices in place to ensure that their impact is aimed at decreasing the negative impacts of the industry. Companies offering certain types of services and products to controversial clients are required to have at minimum a grievance/complaints mechanism and a whistleblower protection policy.
Implemented Management Practices	B Lab has been able to verify that the company has the necessary mechanisms in place to manage the risks related to their business relationships with clients in controversial and ineligible industries, in line with B Lab's requirements (see link below). This includes: - A mechanism for internal and external stakeholders to raise grievances; - A policy that is shared with individuals who raise a grievance, containing information related to the grounds for accepting a grievance and how their grievance will be dealt with, as well as

	related timelines; - A Whistleblower Policy that establishes the company's commitment to protecting whistleblower identity as well as the processes and controls in place to protect stakeholders who raise grievances from any form of retaliation.

Management Comments	<i>At Delphi, our mission is to transform the way organizations generate value to make our world better. GLOBE convenes the innovators and changemakers who are accelerating the clean economy. To build a clean, competitive Canada, all organizations across the ecosystem, including those in sectors with historically higher impacts, need to be part of the transition. We are intentional in how we engage these clients: Delphi and GLOBE qualify the companies and projects we work with to ensure they are meaningful, credible, and aligned with advancing sustainability goals, not indirectly increasing harmful impacts or enabling unsustainable growth. We are mission and values-driven, with policies and processes in place to assess projects and manage risks.</i> <i>If concerns arise, whether through project work or issues raised publicly, we address them head-on with clients. We believe this candid, values-based approach not only safeguards our integrity but also accelerates impact where it is most urgently needed. You can find details around our climate commitments and reporting here.</i>
