Modules

INCIDENT

Make incident reporting and investigation a simpler process with an easy online reporting form and auto-generated email notifications landing directly in key stakeholder inboxes.

SAFETY PLAN

Establish and allocate recurring safety and compliance tasks to individual workplaces, then monitor their progress from the easy-overview dashboard.
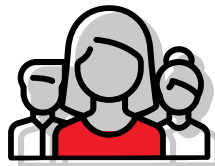

INSPECTIONS

Create customised workplace inspections, checklists and audits, then schedule these to ensure that they are completed within identified timeframes.

ACTION

Input, track and monitor all hazards, corrective actions, and workplace improvements until close-off, complete with reminders to keep things moving.
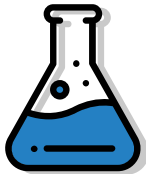

HR

Store worker emergency contact details, training records, worker's compensation documents, and performance management information all in one place.

DOCUMENTS

Gain access to Safety Champion's configurable health and safety manual and other templates, and/or manage versions of your own internal policies and procedures.

CHEMICAL

Allocate chemical Safety Data Sheets to individual workplaces, so that important chemical related hazard information can be shared with your people for improved safety.
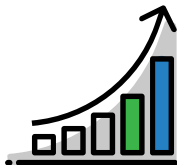

TRAINING

Upload relevant training documentation and certifications, and keep track of upcoming expiry dates so you know your people are properly trained and ready for work.

INSURANCE

Manage all internal and contractor insurances, registrations, licences and certificates, and be reminded as their expiry dates approach.

REPORTING

Monitor how your safety program is progressing with real-time reporting, both on-screen and downloadable!

CONTRACTOR

Utilise the functionality of our records management modules to easily oversee contractor documentation from one simple location.

MENTAL HEALTH

Direct improved workplace mental health guidance and provide anonymous support channels to build a mentally healthier workplace.
