

ChallengeU

Disclosure Report

Date Submitted: August 25th, 2025

Disclosure Materials

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire that B Lab deems relevant for public stakeholders, then, as a condition of their certification, the company must:

- 1) Be transparent about details of the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue
- 3) Demonstrate that management practices are in place to avoid similar issues from arising in the future, when necessary.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit and integrity of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to a background check by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

This document contains a copy of the company's completed Disclosure Questionnaire and related disclosure documentation provided by the company

Disclosure Questionnaire

Industries and Products

	Yes	No
Please indicate if the company is involved in production of or trade in any of the following. Select Yes for all options that apply.		
Animal Products or Services	☐	☒

Negative Social Impact	☐	☒
Other	☐	☒

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Supplier(s) located in Conflict Zones

Topic	Company has a supplier located in Conflict Zones
Summary of Issue	ChallengeU is an educational platform that has one supplier (Racoon Gang) , a company specialized in Learning Management System (LMS) development, headquartered in Talinn, Estonia but has contractors involved in the project located in Kyiv, Ukraine.. Ukraine is listed as a conflict zone in FY25 List of Fragile and Conflict-affected Situations and Global Conflict Tracker.. Ukraine is listed as a conflict zone in FY25 List of Fragile and Conflict-affected Situations and Global Conflict Tracker .
Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)	In 2023-24, 7% of the company's purchases came from a supplier with workforce association in Ukraine.
Impact on Stakeholder(s)	Business activities located in conflict zones are considered high-risk as they are more likely to cause or contribute to the conflict and/or sociopolitical instability. Countries classified as conflict zones are more likely to have a weak rule-of-law or a corrupt judicial system, which could undermine the effectiveness of operational grievance mechanisms for these businesses and their suppliers. In addition, the safety of the company's workers and other potential human rights violations are at risk.
Implemented Management Practices	Having become an integral part of ChallengeU's way of doing business, the Code of Conduct is shared with every new employee, supplier, and business partner. Their sole supplier has shared an anticorruption policy that is applicable to their employees and contractors. The company is committed to adopting responsible, ethical, and transparent behavior and invites its suppliers to follow the same direction. ChallengeU requires its suppliers to sign the Supplier Code of Conduct, which covers ethical, social, environmental, and human rights considerations. In certain exceptional circumstances, when suppliers operate in environments affected by political instability or heightened

	security concerns, they are expected to conduct their activities in strict compliance with human rights principles and international humanitarian law. This includes respect for the Geneva Conventions and the protection of civilian populations and prisoners of war, the prohibition of practices contrary to human rights such as abusive mercenarism or the use of civilians as human shields, and a clear commitment to avoiding complicity in serious human rights violations.
