

DISCLOSURE MATERIALS

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire and B Lab deems them to be material, the company must:

- 1) Be transparent about the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue.
- 3) Demonstrate that management systems are in place to avoid similar issues from arising in the future.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to background checks by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

This document contains a copy of the company's completed Disclosure Questionnaire and related disclosure documentation provided by the company.

DISCLOSURE QUESTIONNAIRE CATEGORY	Environmentally Intensive Industries
TOPIC	Water Intensive Industries
SUMMARY OF ISSUE	As a brewery/distiller, BROL operates in an industry that is water intensive.
SIZE/SCOPE OF ISSUE (e.g. \$ financial implication, # of individuals affected)	In the previous fiscal year, 100% of BROL revenue was earned from the sale of alcohol
IMPACT ON STAKEHOLDERS	As a water intensive industry, brewing/distilling poses risks such as water stress or depletion of local water sources if water use is not appropriately managed.
IMPLEMENTED MGT PRACTICES	Brol choose grains that require less water and are more draught resilient. Brol have and still developing brewing techniques that allow lower water usage without compromising taste of the product. Also, BROL have reduced water usage in our cleaning processes by 2x. BROL also operates out from intensive water treatment which results in lower water usage than any other brewery. BROL have gone from 1:10, to 1:3, and our goal by 2030 is 1:1. BROL have done literature review of water usage in brewing industry. BROL's production is unorthodox and currently requires considerably less water, however water usage in other breweries is not public information thus comparison is not conclusive.
