

## **DISCLOSURE MATERIALS**

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire and B Lab deems them to be material, the company must:

- 1) Be transparent about the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue.
- 3) Demonstrate that management systems are in place to avoid similar issues from arising in the future.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to background checks by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

This document contains a copy of the company's completed Disclosure Questionnaire and related disclosure documentation provided by the company.

## **B Corp Certification - Disclosure Questionnaire Documentation**

PROVIDED BY: EO Products

UPDATED AS OF: 04/17/2020

DISCLOSURE QUESTIONNAIRE CATEGORY	Company operates in a Water Intensive Industry
ISSUE DATE	April 2020
TOPIC	Company creates beauty products which use large amounts of water during the manufacturing process.
SUMMARY OF ISSUE	The company makes products that constitute around 80% of water. The amount of water used is dependent on the volumes of products manufactured. The company has implemented certain water savings practices in both their manufacturing process and facilities management to ensure minimum water waste.
SIZE/SCOPE OF ISSUE (e.g. \$ financial implication, # of individuals affected)	The company utilises local city water in their manufacturing process. The total water usage in 2019 was 7,491.73(cubic m) which includes manufacturing plus facilities.
IMPACT ON STAKEHOLDER(S)	As a water intensive industry, manufacturing of beauty products poses risks such as water stress or depletion of local water sources if water use is not appropriately managed.
IMPLEMENTED MGT PRACTICES	The company installed new equipment on their Reverse Osmosis filter that allows them to reduce waste water and increase usable water for manufacturing by 37%. They also installed drought-tolerant landscaping and drip irrigation around their facility, and low-flow toilets in their restrooms. They also have a closed-loop water system for heating and cooling their manufacturing tanks.
	The company has set a water reduction target of 12.5%. They will set the target date one full year after the installation of the aforementioned water saving processes.
