The mark of
responsible forestry

FSC®

Forest Stewardship Council

This certifies that the raw materials are sourced from well-managed forests and responsible supply chains.

MOCA

Regulates processes and materials for products intended for contact with food.

Certificazione

Corporation

Environmental certification Our organization adopts appropriate practices to minimize its environmental impact, as well as always looking for effective and sustainable improvements.

ABOUT US

Our passion for the art of printing led us to found Grafiche MDM in 1925. Since then, we have been expanding our horizons, evolving from a small handcraft print shop into an ISO 9001:14001 and FSC-certified graphic design, paper-transformation and digital printing company.

Since we can work in the Italian and European market at the highest level, we rely on 3 fundamental principles to ensure maximum customer satisfaction.

Service – Our versatile and experienced team consists of more than 50 engineers who can assist you at every stage of your project, from design, artwork and prototyping to development. We assign each project a dedicated general contractor, who can provide full support to ensure accurate control and ongoing assistance.

Problem Solving – Our engineers have acquired such a high level of expertise that they can accurately and promptly solve any problem that may arise in production.

Flexibility and Promptness – We at Grafiche MDM are a modern company with unparalleled production capacity. We can also work 24 hours a day to produce millions of identical items that are flawless both in colour and finish. Our state-of-the-art equipment is a combination of high-volume production and excellent product machinability. That's our strength.

We arrange our own transport to ensure deliveries on time and in perfect conditions.

OFFSET PRINTING

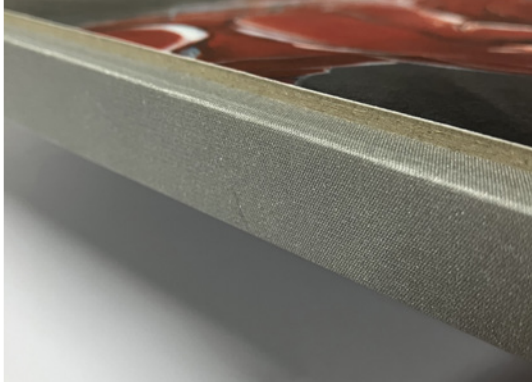

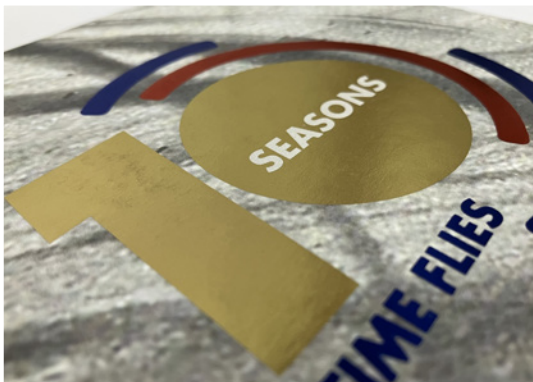

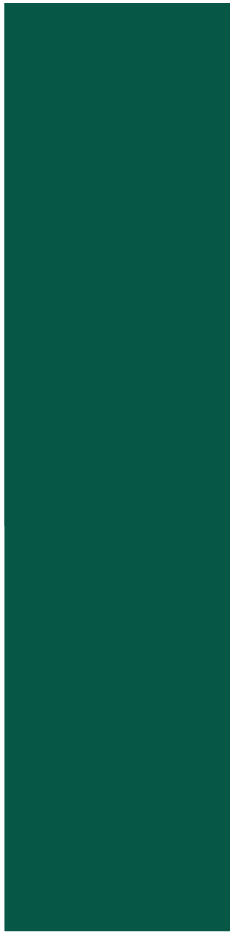

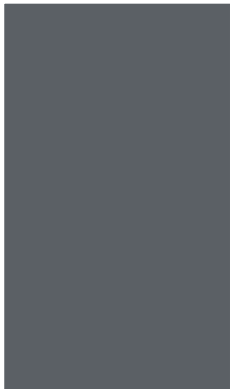

This selection is designed to deliver unrivalled quality of paper, graphics and print quality. Since our foundation in 1925 we at Grafiche MDM have preserved and passed on the know-how of the early master printers, combining it with the latest technology to support our industrial level.

We have invested in and maintained state-of-the-art machinery to set up many production lines that can work without interruption, print large volume in a short time and keep a consistent quality standard at all times.

Folding, die-cutting, embossing and hot-rolling can add a touch of originality and exclusiveness to your prints. Our experts are always up-to-date with the latest techniques in the field and they will be happy to give you their suggestions on the best finishes for your projects.

Our experience and ability to innovate for innovation flow into the quality of our products, as shown by the large number of certificates and awards we have received.

PACKAGING

In today's world, it is absolutely essential that your communication is engaging and immediately grabs the attention of your audience. But it is even more important that your audience does not forget you over time.

Your products should tell a story. We should not only mind their substance, but also their packaging. Colours, shapes and messages should speak the same language and strike the right emotional chords.

We at MDM Graphics can provide you with high quality and easy-to-assemble packaging, such as caskets, displays, cases, stickers and shoppers to decorate your products in the most eye-catching and stylish way.

High-Volume Production

We at Grafiche MDM have recently acquired a major company specializing in paper-transformation and equipped with the most advanced machinery. Now we can achieve a mass-production of millions of boxes at significant industrial rates.

Our semi-finished products fit perfectly into automatic industrial machinery thanks to our quality standards for pre-creasing and die-cutting and the millimetre accuracy of cutting and bending. Our end customers can then start their mass production. And it can run smoothly and flawlessly.

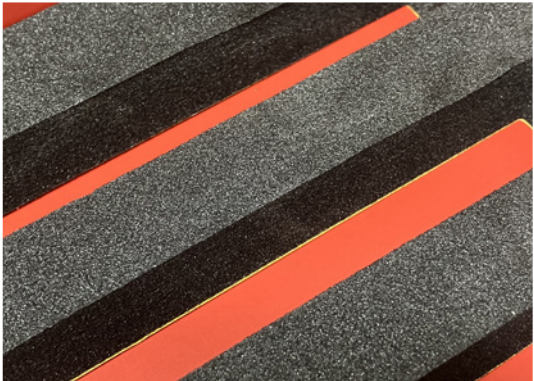

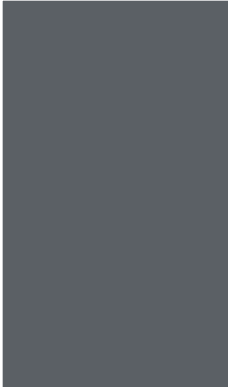

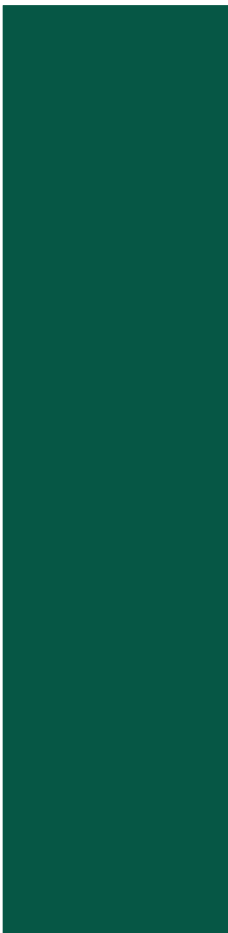

Special Paper-Transformation

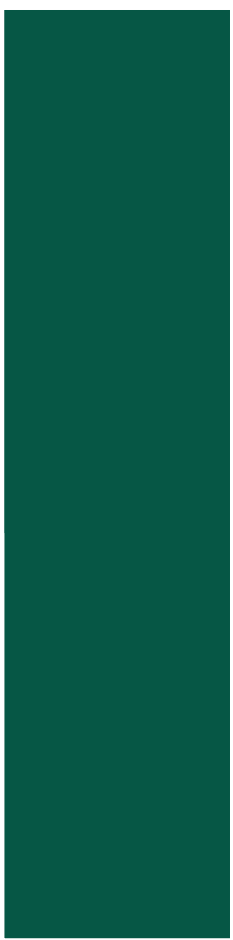

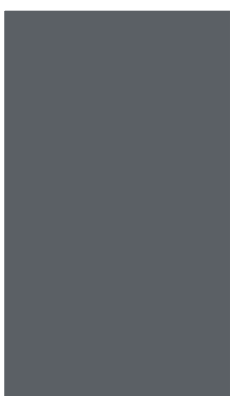

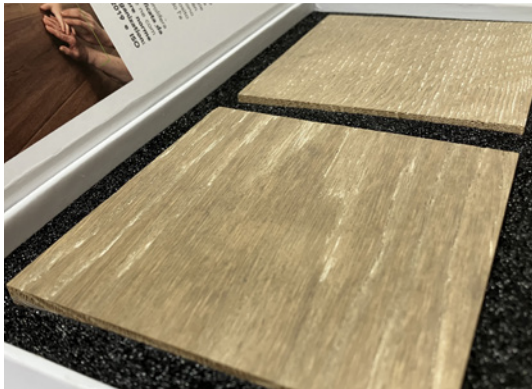

At Grafiche MDM, we combine corrugated and solid cardboard to produce durable and accurately finished packaging, such as boxes, displays, window panels, sales and promotional items, etc.

Shoppers

We can provide you with countless types of shoppers with multiple printing techniques in a wide range of materials, such as paper, plastic, Tnt, cotton and the most modern biodegradable materials, as well.

In the production phase, we benefit from the valuable collaboration of some women prisoners of the provincial prison in Forlì, Italy. We firmly believe that the development of vocational skills and the mindset that comes with work can change the lives of women prisoners and prevent them from falling back into crime when they are released.

DIGITAL PRINTING

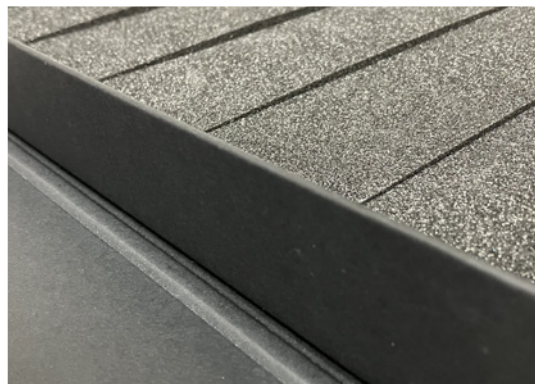

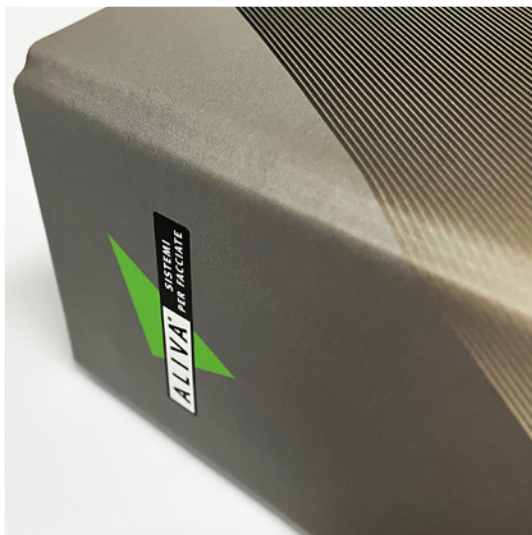

This printing technique stands for high definition and speed: it quickly takes your ideas and projects from computer to packaging, saving time and money.

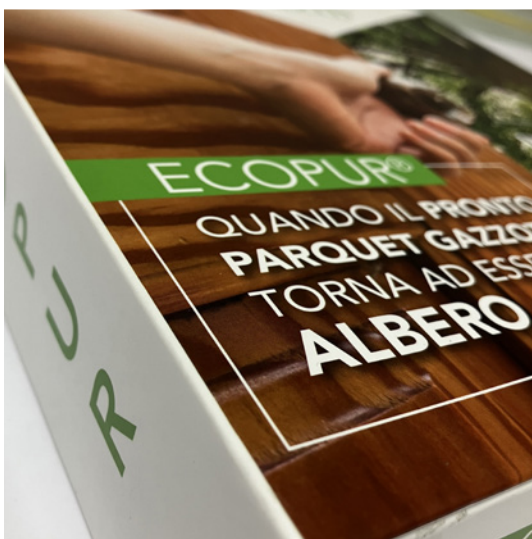

After approving a sample, we can transfer it directly from a machine to the printing substrate of your choice. This results in a smart and dynamic sheet-by-sheet printing where you can change your samples even while production is running.

Thanks to our 30-year-long experience and our investment in the latest equipment, we at Grafiche MDM have become a leader in the printing black and white and colour user manuals with certified and fully customized colour samples for small and large runs.

We have an impressive department of 18 professional engineers, who do not only produce millions of automatically managed manuals, but also small print runs.

At Grafiche MDM, we can support the mass-production of manuals and maintenance kits: complete packages of user manuals, spare parts and any other necessary components.

SPECIAL PRODUCTION

We at Grafiche MDM are specialized in laminating. For this reason, lamination is always a stimulus to our interest and curiosity. This attitude is also the source of our patents, i.e. the ability to think about how to achieve the desired results in industrialized projects. Paper-transformation, offset printing, laminating, die-cutting, etc. are just like a tailor-made suit for each and every project.

Our special productions add that extra touch to enhance a particular detail of your projects. Thanks to our thorough knowledge of traditional and emerging techniques, we can provide any finish and find the most appropriate and creative bookbinding solution on a case-by-case basis.
