Disclosure Report

Date Submitted: April 5th, 2024

Disclosure Materials

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire that B Lab deems relevant for public stakeholders, then, as a condition of their certification, the company must:

- 1) Be transparent about details of the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue
- 3) Demonstrate that management practices are in place to avoid similar issues from arising in the future, when necessary.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit and integrity of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to a background check by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Environmentally Intensive Industries - Biodiversity Impact and Monoculture Agriculture

Topic	Biodiversity Impact and Monoculture Agriculture
Summary of Issue	As a coconut cultivator, Paraiso Verde operates in an industry in which biodiversity impact and monoculture agriculture are material environmental issues.
Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)	<p>The company owns and controls 153 acres of land of which approximately 5% is under cultivation while the rest of the land has been registered as a reserve. The company harvests coconuts from the trees that grow naturally and therefore there is no active replanting each season.</p> <p>The coconuts from this plantation constitute approximately 60% of the company's input volume of coconuts.</p>
Impact on Stakeholders	Agriculture, particularly in cases where a single crop is cultivated at a time, poses a risk to local ecosystems of flora and fauna as well as the potential degradation of cultivated land. The clearing of natural habitat can result in the abundant decrease of local biodiversity and can also facilitate the entry of invasive alien species.
Implemented Management Practices	<p>The company has registered 95% of the land that it owns as a reserve. The company utilizes principles of syntropic farming i.e. agroforestry for its coconut plantation by mixing different kinds of plants and trees that help each other and further the company does not use fertilizers or pesticides.</p> <p>They work with a local ngo called Floresta Viva to identify the different species of trees and animals on their land before starting a plan of replantation and conservation.</p> <p>Further, the company does not need to irrigate owing to the nature of their crops and uses minimal water only for cleaning of the crops and equipment.</p>

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Facilities located in sensitive ecosystems

Topic	Company has a coconut plantation located in the Atlantic rainforest in Brazil
Summary of Issue	<p>The Atlantic rainforest is an ecosystem that stretches along the Eastern coast of Brazil, with important biodiversity and endemic species. More than 85% of the original area of the forest in the country has been deforested already and it is estimated that deforestation continues at an annual rate of 0.5 to 2.5% due to agriculture, hunting, logging or fire.</p> <p>As a whole, the Atlantic rainforest doesn't have a protected classification but there are portions that are designated as national parks, state parks and private reserves. The Atlantic rainforest also contains 25 protected areas that are designated as UNESCO World Heritage Sites. Therefore many institutions and conservation groups are working for the restoration of the forest and ecosystem.</p>
Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)	100% of the company's facilities, in terms of area, are located in this sensitive ecosystem and the coconuts from the company's plantation constitute approximately 60% of the company's input volume of coconuts.
Impact on Stakeholders	There are no potential risks linked to the company's operations as they only use coconuts from trees that grow naturally along the beach as opposed to plantation-grown trees.

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Water Intensive Industry

Paraíso Verde is involved in the production/sale of products, or is part of an industry that can potentially be classified as water intensive, meaning that they are more likely to have significant impacts on the environment, such as water stress or depletion of local water sources if water use is not appropriately managed. Certified B Corps are required to make transparent their involvement in such activities or industries.

Any party aware of specific company practices that have had a negative impact related to its involvement in these or other controversial industries, and which may constitute a violation of the B Corp standards, may contact us via our [public complaints procedure](#).
