

DISCLOSURE MATERIALS

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire and B Lab deems them to be material, the company must:

- 1) Be transparent about the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue.
- 3) Demonstrate that management systems are in place to avoid similar issues from arising in the future.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to background checks by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

This document contains a copy of the company's completed Disclosure Questionnaire and related disclosure documentation provided by the company.

DISCLOSURE QUESTIONNAIRE

Company Name: D'Orica
Date Submitted: February 14, 2019

Disclosure Industries	Yes	No
Please indicate if the company is involved in production of or trade in any the following. Select Yes for all options that apply.

Construction or operation of company involved large scale land conversion and/or degradation		✓
Construction or operation of company involved the construction or refurbishment of dams		✓
Company has had material breaches of individual's confidential information		✓

B Corp Certification - Disclosure Questionnaire Documentation	
PROVIDED BY:	D'Orica
UPDATED AS OF:	February 14, 2019
DISCLOSURE QUESTIONNAIRE CATEGORY	Disclosure Industries
TOPIC	Sensitive industry - company involved in using precious metals (e.g., gold)
SUMMARY OF ISSUE	"D'Orica is a gold jewellery producer. Companies that purchase mineral resources such as gold have a higher risk of encountering social and environmental issues in their supply chains, as these resources are often sourced from conflict-affected areas. Specifically, money laundering, human rights violations, and contributions that fund armed conflict (directly or indirectly) are material risks present in the industry. D'Orica has taken steps to ensure a majority of the raw materials it purchases are fully traceable and have third party certifications verifying that they are ethically sourced."
SIZE/SCOPE OF ISSUE (e.g. \$ financial implication, # of individuals affected)	"70% of the input material is sourced from banks in Italy and is traceable and ethically certified by either RJC (https://www.responsiblejewellery.com) and/or LMBA's Responsible Gold Guidance through the Good London Delivery certification (http://www.lbma.org.uk/assets/market/gdl/RGG%20v6.0%20201508014.pdf) 30% of the gold used as an input material in products is provided by other traders (e.g. customers of D'Orica who supply the raw material – pure gold – under contract work to be transformed into finished products) and thus, its origin cannot be traced in terms of supply chain practices"
IMPLEMENTED MGT PRACTICES	The company has a supplier screening policy in place that includes social and environmental criteria. Currently, the above mentioned certifications are not explicitly mentioned as screening criterion.
REPORT	N/A
OTHER MANAGEMENT COMMENTS	N/A
