

DISCLOSURE MATERIALS

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire and B Lab deems them to be material, the company must:

- 1) Be transparent about the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue.
- 3) Demonstrate that management systems are in place to avoid similar issues from arising in the future.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to background checks by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

This document contains a copy of the company's completed Disclosure Questionnaire and related disclosure documentation provided by the company.

B Corp Certification - Disclosure Questionnaire Documentation

PROVIDED BY: Hilanderia Warmi

UPDATED AS OF: 06/04/2019

DISCLOSURE	Facilities located in sensitive ecosystems
QUESTIONNAIRE	
CATEGORY	
ISSUE DATE	
TOPIC	Company and its suppliers operate in Puna grasslands
SUMMARY OF ISSUE	Hilanderia Warmi operates in the Puna grasslands, an ecosystem in Argentina that is threatened by human activity. The company also sources its input materials, llama and sheep wool, from suppliers that operate in this ecosystem.
SIZE/SCOPE OF ISSUE (e.g. \$ financial implication, # of individuals affected)	"60% of Hilanderia Warmi's operations are located in the Puna region, and 90% of their raw materials are llama and sheep fibers produced in this region. Specifically, 75% of Hilanderia Warmi's material purchases are llama fibers, 15% of material purchases still come from sheep, and 10% are a cotton mix that is not produced in the Puna region."
IMPACT ON STAKEHOLDERS	Sheep farming in the region is a cause of environmental degradation, as overgrazing causes native grasses to be destroyed. Llamas, on the other hand, do not impact the root systems of grasses when grazing and thus are an environmentally preferred alternative. The company has a stated goal to have 100% of its material purchases come from llama fibers.
IMPLEMENTED MGT PRACTICES	Hilanderia Warmi has a mission to protect the Puna grasslands by creating a market for Ilama fibers through payment of above market prices. The company also provides capacity building to ensure their suppliers have access to adequate tools, such as shears.
REPORT	http://intainforma.inta.gov.ar/?p=32334
OTHER MANAGEMENT COMMENTS	Our mission is to promote and position llama fiber at a national and international level, through design, communication and marketing, which will cause the market to attract more demand. Through this mission, we aim to positively impact the native pastures of the Puna ecosystem, which are currently being altered by sheep grazing in the region.
