COOKS WHO FEED INC.

COMPANY PROFILE

At Cooks Who Feed, we create kitchen linens that empower food lovers to take action toward a hunger-free world. Our flagship product, our handcrafted canvas aprons, provides 100 meals for every apron sold. We fulfill this promise through our charity partners that provide immediate hunger relief.

To date, we've provided close to 2 million meals to those suffering from food insecurity.

What makes us relevant to our customers is what makes us different, our multilevel impact. There is a social benefit in every step of our process.

- 1) For every product sold, there is a giveback providing meals to those in need.
- 2) All our textiles are ethically handmade by a team of underprivileged women in India. We provide these women with safe, fair trade work with the goal of getting them out of poverty.
- 3) We bring sustainable fashion to the kitchen. We only use natural, local, and recycled fabrics and we take an eco-friendly approach to every stage of production. A lot of detail has gone into designing our textiles to make them stylish, functional, and eco-friendly.

CUSTOMIZATION & PACKAGING

For wholesale customers, we offer our retail line and the option to create their own exclusive textiles. Clients can choose from a range of colors and styles and include their name and/or logo.

For canvas tote orders, fabric wine inserts can also be added.

Every product comes with a hangtag that explains the impact and is signed by the maker. Hangtags may also be customized.

Wholesale pricing varies by quantity and customization. Contact us for pricing.
