Disclosure Report

Date Submitted: September 6th, 2023

Disclosure Materials

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire that B Lab deems relevant for public stakeholders, then, as a condition of their certification, the company must:

- 1) Be transparent about details of the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue
- 3) Demonstrate that management practices are in place to avoid similar issues from arising in the future, when necessary.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit and integrity of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to a background check by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

This document contains a copy of the company's completed Disclosure Questionnaire and related disclosure documentation provided by the company

Disclosure Questionnaire

Industries and Products

	Yes	No
Please indicate if the company is involved in production or trade in any of the following. Select Yes for all options that apply.		
Animal Products or Services	☐	☒
Biodiversity Impacts	☐	☒
Chemicals	☐	☒
Disclosure Alcohol	☐	☒
Disclosure Firearms Weapons	☐	☒
Disclosure Mining	☐	☒

Negative Social Impact	☐	☒
Other	☐	☒

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Disclosure Industries

Topic	Clients in Controversial Industries
Summary of Issue	Bartle is a management consultancy based in France that has had clients operating in the Gambling industry. The services provided by the company included reshaping the CSR department with the integration of responsible gaming or building a cultural transformation program.
Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)	Over the past 5 years the company has had 2 clients operating in the Gambling industry. In the FY2022, the clients operating in this industry represented 0.03% of the company's revenue
Impact on Stakeholders	Companies that work with clients in controversial industries can indirectly increase the harmful impact to stakeholders by enabling business growth. Therefore, companies that work with clients in these industries should have practices in place to ensure that their impact is aimed at decreasing the negative impacts of the industry. B Lab has flagged the involvement of companies with clients in controversial industries as a material issue and new standards will be created to address possible risks related to this matter.
Implemented Management Practices	Bartle states that it encourages its consultants to push social and environmental KPIs in their mission and to encourage clients to consider social and environmental impact and issues, done partly through the participation of consultants in CSR training. Bartle has implemented a code of Ethics, shared internally, a document that covers the company's: • Ethical business conduct • Respect for fundamental rights • Anti-corruption and conflicts of interest • Improving working conditions • Consideration of the environmental impact of its activities • Promoting a positive social footprint • Role model The code of ethics is reflected in the company's internal

	regulations and it is communicated to all consultants upon entry and when it has been updated. The company is also in the process of creating an ethics committee to review potential controversial issues (missions, clients, internal practices, ...). The committee will be responsible for ensuring that the company's actions and decisions are consistent with the firm's frame of reference, its values and its CSR commitments. This consultative committee will share its positions with the decision makers. The intention of the company in creating such a committee is to enable consultants to address the committee when questions arise in relation to potential or ongoing clients and also to systematically review commercial opportunities when they are linked to controversial industries. The list of controversial industries and practices is based on B Corp's referential. Its first session should be held by Q4 2023.
