HEALTH & WELL-BEING

Trading ingredients of the highest value for people's health

RESPECT FOR NATURE

Respect the nature of the plant material and its environment.

SMALL PRODUCERS

Economically and socially promoting small producers

BORN IN THE AMAZON

Q'omer was born from a vital and personal experience in the Peruvian Amazon where we felt that the time had come to face three fundamental challenges:

- 1) To provide ingredients of the highest value for people's health and well-being
- 2) To respect the nature of the plant material and its environment
- 3) To economically and socially promote small producers

Inclusive development A SOCIAL BUSINESS MODEL

It relies on biotechnology to guarantee the very high quality and efficiency of the products we provide, dealing directly with customers and small producers and together with the traceability and supervision of an ethical and responsible supply chain.

We are revolutionising trading by adopting a new approach to the basis of our business, nature conservation and inclusive development throughout the supply chain.
