

Oaklins NL

Disclosure Report
Date Submitted: April 16th, 2026

Disclosure Materials

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire that B Lab deems relevant for public stakeholders, then, as a condition of their certification, the company must:

- 1) Be transparent about details of the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue
- 3) Demonstrate that management practices are in place to avoid similar issues from arising in the future, when necessary.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit and integrity of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to a background check by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

B Lab's Public Complaints Process

Any party may submit a complaint about a current B Corp through [B Lab's Public Complaint Process](#). Grounds for complaint include:

- 1) Intentional misrepresentation of practices, policies, and/or claimed outcomes during the company's [certification process](#)
- 2) Breaches of the B Corp Community's core values as expressed in our [Declaration of Interdependence](#)

This document contains a copy of the company's completed Disclosure Questionnaire and related disclosure documentation provided by the company.

Disclosure Questionnaire

Industries and Products

	Yes	No
Please indicate if the company is involved in production or trade in any of the following. Select Yes for all options that apply.		
Animal Products or Services	☐	☒

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Zero Hour Contracts

Oaklins NL has an employee(s) under Zero Hour Contract which allows the employer to vary the working hours of an employee, with no guarantee of employee hours, while the employee is required to be on call. Certified B Corps are required to make transparent their involvement in such industries.

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Other Disclosure Industries

Topic	Clients in Controversial and Ineligible Industries
Summary of Issue	Oaklins has clients in the following industries: Fossil Fuels and Pharmaceutical The types of services offered to these clients include: - Merge and acquisition as well as financial advisory.
Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)	In the last fiscal year, <1% of the company's annual revenue was from clients in the Fossil Fuels and Pharmaceutical industries. The company has not worked with clients in other controversial or ineligible industries in the past.
Impact on Stakeholders	Companies that work with clients in controversial industries can directly or indirectly increase the harmful impact to stakeholders by enabling business growth. Therefore, companies that work with clients in these industries should have practices in place to ensure that their impact is aimed at decreasing the negative impacts of the industry. Companies offering certain types of services and products to controversial clients are required to have at minimum a grievance/complaints mechanism and a whistleblower protection policy.
Implemented Management Practices	B Lab has been able to verify that the company has the necessary mechanisms in place to manage the risks related to their business relationships with clients in controversial and ineligible industries, in line with B Lab's requirements (see link below). This includes: - A mechanism for internal and external stakeholders to raise grievances; - A policy that is shared with individuals who raise a grievance, containing information related to the grounds for accepting a grievance and how their grievance will be dealt with, as well as related timelines; - A Whistleblower Policy that establishes the company's

	commitment to protecting whistleblower identity as well as the processes and controls in place to protect stakeholders who raise grievances from any form of retaliation.

Other Management Comments	At Oaklins Netherlands, we recognize that our work as a corporate finance advisor can have implications for a broad range of stakeholders, including our clients, their employees, shareholders and the wider market. While our role is advisory in nature and typically transaction-based, we understand that the engagements we accept may have broader social, environmental and governance implications. Therefore, we aim to approach client engagements with care, professional judgment and critical reflection. We are committed to considering potential risks, unintended consequences and stakeholder interests when evaluating opportunities. Through this approach, we seek to support responsible decision-making and contribute to long-term value creation for our clients and the broader market.
