

DISCLOSURE MATERIALS

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire and B Lab deems them to be material, the company must:

- 1) Be transparent about the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue.
- 3) Demonstrate that management systems are in place to avoid similar issues from arising in the future.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to background checks by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

This document contains a copy of the company's completed Disclosure Questionnaire and related disclosure documentation provided by the company.

Disclosure Energy and Emissions Intensive Industries Cont UNESTIONNAIRE CATEGORY 15-Nov-22 TOPIC Disclosure Energy and Emissions Intensive Industries Cont. MPLEMENTED MCT PRACTICES Given that your industry is energy and emissions intensive, what measures have you taken to manage your energy use and carbon emissions? a. So far with Diesel and the date of this application, nothing, (But the company is developing measures to reduce its emissions for this concept in the short term. b. Regarding the measures managed for the company's packaging materials, the company has changed and replaced: b.1. cardboard boxes, by plastic logistic boxes, those that of course have a much longer useful life and that can be recycled once they are in poor condition. b.2. The films, the company has replaced up to 80%, since it invests in padded covers to pack furniture, beds, clothes, etc. b.3. Packaging tape, substituted in more than 95%, the company almost no longer uses them, since the company no longer use cardboard boxes. The company invested in reinforced straps for tying purposes for the reusable covers. Does the company have any specific energy and/or carbon reduction objective, and what is it? Of course, EcoMovers has already made all the changes and modifications to its supplies and packaging materials. And the company is on its way to reducing its main source of energy. Does the company carry out evaluations or comparative studies of its consumption with respect to other industries in terms of energy use, carbon emissions, and how are these impacts managed? Yes, EcoMovers is certified with the Carbon Neutral Company. Through an external company, the company measured its carbon footprint for its main sources. Part of this measurement is to deliver the indicators for each item of its evaluation. Does your company use any of the best practices related to minimizing energy use and carbon emissions? If so, what are they and how do you manage these best practices? As discussed and answered in question No. 4, all th
