

DISCLOSURE MATERIALS

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire and B Lab deems them to be material, the company must:

- 1) Be transparent about the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue.
- 3) Demonstrate that management systems are in place to avoid similar issues from arising in the future.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to background checks by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

This document contains a copy of the company's completed Disclosure Questionnaire and related disclosure documentation provided by the company.

B Corp Certification - Disclosure Questionnaire Documentation

PROVIDED BY: TEBRIO UPDATED AS OF: 11/02/2022

Environmentally Intensive Industries
November 6th 2022
Energy and Emissions Intensive Industries
The company breeds the mealworm Tenebrio Molitor and manufactures diverse products and operates in an industry that is energy and emissions-intensive.
100% of the company's revenue consists of processing tenebrio molitor
Manufacturing and animal agriculture are major contributors to global emissions.
TEBRIO has carried out the following actions to reduce energy expenditure to reduce CO2 footprint: -Training actions: awareness training focused on the responsible use of energy and efficiency in driving (worker training) has been carried out. -Approval of investment in more efficient technology and new energy sources: Installation of self-consumption photovoltaic panels. Commitment to biomass as a source of heat generation, - Substitution of equipment for more efficient and lower consumption models (eg low consumption motors and lights). - Installation of independent energy meters for each work sector, to manage energy expenditure through the ERP System (Enterprise Resource Planning) to determine methods for consumption efficiency - Installation of heat recuperators in the animal breeding chambers. - Heat generation source for offices and common areas from aerothermal energy. - Installation of air conditioners with a "free-cooling" option when outside conditions are favorable. - Collaboration agreements with local entities to carry out emission compensation projects. All these actions are included in the ""Industry 4.0"" process for the centralized and efficient management of energy consumption. -Tebrio's electric energy is supplied by Iberdrola and with a Guarantee Certificate indicating that 100% of the energy consumed by the company comes from renewable energy sources. -Biomass is used to feed heating boilers

B Corp Certification - Disclosure Questionnaire Documentation

PROVIDED BY: TEBRIO UPDATED AS OF: 11/02/2022

DISCLOSURE QUESTIONNAIRE CATEGORY	Animal Products and Services
TOPIC	Company breeds the mealworm Tenebrio Molitor and manufactures diverse products based on this insect.
SUMMARY OF ISSUE	The company breeds the mealworm Tenebrio Molitor on an industrial scale.
SIZE/SCOPE OF ISSUE (e.g. \$ financial implication, # of individuals affected)	100% of TEBRIO's revenue comes from products derived from processed mealworm Tenebrio Molitor.
IMPACT ON STAKEHOLDERS	Animal farms may have adverse impacts on the environment and animal welfare concerns.
IMPLEMENTED MGT PRACTICES	TEBRIO applies the following welfare practices for the Tenerio Molitor although the industrial use of this species of insect is not regulated: •The temperature and humidity conditions are controlled and are ideal for the growth of the animal. •The number of animals per breeding box is controlled to avoid overpopulation. •The diet offered is based on cereals from wheat, barley, and corn and does not include raw materials derived from urban waste or similar. •The sacrifice is carried out in a way that avoids theoretical suffering (since the animals lack a nervous system), by means of cooking that causes instantaneous mortality. This process is regulated (time/temperature pair) and controlled. •Pressure or crushing of live animals is never performed. KPIs associated with the indicated well-being techniques have not been determined; control points are monitored and corrections are made when deviations are detected.
