

DISCLOSURE MATERIALS

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire and B Lab deems them to be material, the company must:

- 1) Be transparent about the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue.
- 3) Demonstrate that management systems are in place to avoid similar issues from arising in the future.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to background checks by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

This document contains a copy of the company's completed Disclosure Questionnaire and related disclosure documentation provided by the company.

DISCLOSURE QUESTIONNAIRE

Company Name: The Delphi Group
Date Submitted: 08/01/2021

Industries & Products	Yes	No
Please indicate if the company is involved in production of or trade in any the following. Select Yes for all options that apply.

B Corp Certification - Disclosure Questionnaire Documentation

PROVIDED BY: Isaac Operations

UPDATED AS OF: March 25 2022

DISCLOSURE QUESTIONNAIRE CATEGORY	Clients in Controversial Industries
ISSUE DATE	August 2021
TOPIC	Clients in the nuclear energy industry
SUMMARY OF ISSUE	Isaac Operations is a Canadian operational consulting company with clients that are nuclear power plants in Canada supplying power to the grid. The company typically provides services to such clients to improve the productivity of maintenance crews with the aim of improving the rate of completion of maintenance tasks and overall improvement of functionality of the plants.
SIZE/SCOPE OF ISSUE (e.g. \$ financial implication, # of individuals affected)	<p>Services related to the nuclear energy industry represented ~24% of the company's revenue in 2020.</p> <p>The services provided by the company are not specifically designed for the nuclear energy industry and can be provided to clients in other industries as well.</p>
IMPACT ON STAKEHOLDERS	Industries included in the Disclosure Questionnaire of the B Impact Assessment are recognized as having a potential risk for negative stakeholder impact. Providing industrial engineering services to nuclear energy clients does not directly relate to the potentially harmful aspects of the nuclear energy industry, but does provide operational support to the industry.
IMPLEMENTED MGT PRACTICES	<p>The company declared that all their clients in the nuclear energy industry fully comply with all pertinent legislation.</p> <p>At the conclusion of all projects, the company calculates the external impact of the improvements they made through their services including a calculation of reduction in waste, energy and other resources.</p> <p>The company prioritizes their business development in areas that are strategically interesting and the company is currently investing in growing their healthcare service offering.</p>
