

Raízes Desenvolvimento Sustentável

Disclosure Report

Date Submitted: November 18th, 2024

Disclosure Materials

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire that B Lab deems relevant for public stakeholders, then, as a condition of their certification, the company must:

- 1) Be transparent about details of the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue
- 3) Demonstrate that management practices are in place to avoid similar issues from arising in the future, when necessary.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit and integrity of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to a background check by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

This document contains a copy of the company's completed Disclosure Questionnaire and related disclosure documentation provided by the company

Disclosure Questionnaire

Industries and Products

	Yes	No
Please indicate if the company is involved in production of or trade in any of the following. Select Yes for all options that apply.		
Animal Products or Services	☐	☒
Biodiversity Impacts	☐	☒
Chemicals	☐	☒
Disclosure Alcohol	☐	☒

Negative Social Impact	☐	☒
Other	☐	☒

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Other - Clients in Controversial Industries

Topic	Company serves clients in Controversial Industries
Summary of Issue	Raízes Desenvolvimento Sustentável is a company that creates and implements projects to promote territorial development and transformation. They provide services to clients in controversial industries such as mining. Their services can also be sold to non-controversial industries.
Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)	For the fiscal year 2023, the revenue generated from clients in the mining industry accounted for approximately 47.23% of the company's overall revenue.
Impact on Stakeholders	Companies that work with clients in controversial industries can indirectly increase the harmful impact to stakeholders by enabling business growth. Therefore, companies that work with clients in these industries should have practices in place to ensure that their impact is aimed at decreasing the negative impacts of the industry. B Lab has flagged the involvement of companies with clients in controversial industries as a material issue and new standards will be created to address possible risks related to this matter.
Implemented Management Practices	The company acknowledges mining mitigation projects as a positive step towards holding companies accountable for externalities. Their aim is to achieve the best possible positive outcomes with the allocated resources by creating and implementing projects that enhance socio-biodiversity. The company's goal is for the mining sector to evolve and deliver much more than the minimum or legally required. The company is committed to distancing itself from mining companies that do not strive to do more for the planet and its people in the near future. The company works with the training of vulnerable people and the development of small family businesses with a view to strengthening culture and conserving nature. Their aim is to be transparent regarding the type of resource and the company's participation in each action to avoid their work being used for greenwashing.
