ContourFoam™ Post-operative Liposuction Foam

Economical ContourFoam™, designed to mimic the original compression foam Reston, allows for uniform compression after liposuction when used with compression garments. Post-operative liposuction foam has been shown to reduce bruising and swelling. Our soft, open-cell foam is easy to apply and allows you to trim and cut the foam to fit even difficult-to-reach areas. The large roll size (14" by 72") will easily cover any post-op suctioned location, including the abdomen, legs, arms, face, and neck, using only one roll.

B 89600 ContourFoam™ post-operative liposuction foam, 0.5" x 14" x 72" roll. Four rolls per box.

Benefits of ContourFoam™

- Uniform compression
- Reduces bruising
- Reduces swelling
- Large size for seam-free application
- For all body parts where uniform compression and healing is desired
- Flexible polyurethane foam for worry free use
- Very economical
