My family moved from Connecticut to Tequesta, Florida in the mid seventys while I was still obtaining my college degree. Back then, the present site of the Jupiter Reef Club (JRC) was a small bar right on the beach with a typical beach front/surfer ambiance. The Jupiter/Tequesta area was still very rural back then with a small town atmosphere and a perfect blend of south florida nature and beauty along with the most perfect beach. I still believe that now after having traveled to some of the most promoted beaches in the states and the caribbean.

In the mid 1980's, the property was purchased and converted into the timeshare. The property was grandfathered into its current location on the beach side. My parents bought a week when they first went on sale. My family and I have been coming ever since and I have owned various units over the years. I now stay at the resort during my week as it truly is a fantastic resort and now I would not trade my time there for anywhere else.

As a local owner, it is also the perfect place for a relaxing weekend visit. That's also why I own a timeshare week there. The amenities and friends can't be matched. There is always a blend of local owners and visitors spending their week there.

EDUCATION: Bachelor of Applied Science in Information Technology, 1980, Florida Atlantic University, Boca Raton, Florida.

BACKGROUND: Have been in the IT field for 40 years, the last 30 in IT management. I have worked for private industry, for software companies and government. I am a high level IT manager responsible for enterprise application systems that organizations rely upon to run their business. I run the project management office that is responsible for the implementation of high value projects that result in improvements in efficient and effective operation of all business units to serve their customers. I manage an annual budget of over 7 million dollars with the goal to reduce spending while continuing to deliver more services with less resources. I perform IT portfolio management and strategic planning to ensure IT resources align with corporate objectives at the lowest cost.

In closing, I have a vested interest in the future of the JRC and that it delivers the experience expected of all owners. I submit that my knowledge and history of the area and the resort, my ability to understand the balance that needs to exist between one time or repeat visitors/owners and local owners, my management experience and skills, will continue to be an excellent complement to the existing Board. I also feel that the job of any board is to set vision and policy, establish guidelines that deliver a high return for the lowest investment, deal with emergencies while keeping costs low, and selecting the most qualified staff to perform ongoing management duties.

The current Board priorities of a new seawall, facility repairs and ongoing unit upgrades must be foremost in everyones mind in order to protect and preserve our investment in a very special place.
