

corporate gifting done differently

A high-impact, low-effort solution to send intentional and purposeful gifts to your people—without the painful guesswork.

**you send a collection via email,
your recipient selects their own perfect gift**

- 1 Browse by brand, price-point, occasion, or vibe to send the perfect set of gifts for your recipient to choose from.
- 2 Make the experience even more memorable with your custom logo, email design, and gift message.
- 3 Choose a send date and add their email; collect the mailing address on redemption with the recipient's input.

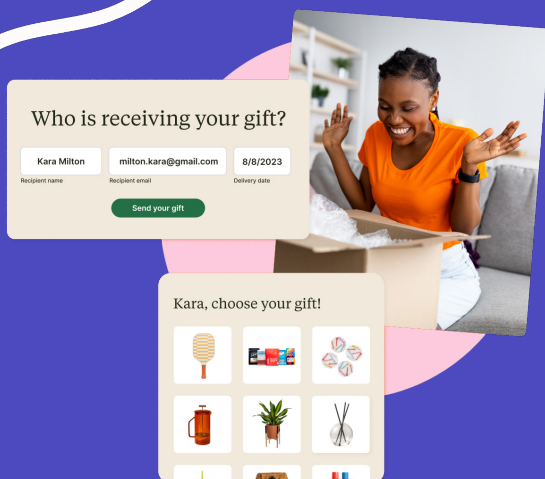

...it's that easy!

**your employees & your customers
are different—their gifts should be too**

Corporate gifting produces results, but with highly inefficient spend and lack of measurability. Our collections allow you to create a range of gifts that relate most to your gifting milestone and your recipient, without revealing the price tag.

When **every** recipient gets something they **want**, you optimize your impact to spend ratio and prevent waste—for your budget and the planet.
