

Several generations have been necessary to patiently built one of the largest and greatest estates in the area, focused on key appellations such as Château-Chalon, l'Étoile and Arbois. The Domaine MAIRE & Fils covers nowadays 234 hectares of vines producing all the area grapes varieties.

## Appellation

The Jura wine region is small in size but large in its remarkable diversity. It covers 80 kilometres between Burgundy and Switzerland, in the eastern France.

The Arbois AOC is the oldest and largest of the Jura's four geographic AOCs. In particular, it was France's first AOC (created in 1937).

Its name originates in the Celtic words "ar" and "bois" that would mean "fertile land".

## Grape variety

100% Trousseau

Besides the world-famous Pinot Noir, the Jura has the wealth to hold two native varieties: the Trousseau and the Poulsard.

The Trousseau is a late and demanding grape variety of local origin and requires lighter, gravelly and warm soil. Once vinified, it develops intense, peppery, spicy flavours and accents of red fruits.

## Terroir

In order to create this harmonious Arbois Trousseau, we identified and selected one of the best plot adapted to this grape variety in the historical family Maire's estate: The "Aux Anes" (donkey) parcel located in the far north of the Domaine and to the northwest of the Arbois village:

- Surface: 4,96 Ha
- West and North West exposure
- Average age of vines : 28 years ( 1993 )
- Soils: clays and marls.

The work in the vines, is based on the respect of the nature and the soil. For young vines, located on steep slopes, to avoid erosion, we cultivate a row out of two, practice soil reassembly to aerate the lands subjected to settlement due to moisture, and grass with plants. Such as clover, which, by competing on the vine, can modulate its mineral and water supply and control its vigour and yield.

The Guyot double size is necessary to better control its performance.

## Vintage : 2020

The current public health crisis has certainly marked this year's harvest, which nonetheless has been able to go ahead!

We were slightly less affected in the Jura vineyards, by drought than other regions thanks to rain during the month of August. One of the main challenges with this very early harvest was to achieve both optimal ripeness and balance.

Harvest was spread over a month on this estate, which has 234 ha (578.22 ac) in production this year. The harvest was good thanks to the replanting and reorganizing carried out in the vineyard over the last five years.

Initial tastings, Jacques Hauller:

'The Jura, now more than ever, can lay claim to being the sixth sub-region of Burgundy! It boasts citrusy Chardonnays with a distinct mineral quality despite the very ripe state of the grapes and fruity Pinot Noirs with ripe tannins.

Careful plot selection reveals the potential of our Vignes aux Anes Trousseau; Vignes de Sorbief Savagnin and Chardonnay; a new gem like the delicate, elegant Pinot Noir in Arbois-Pupillin in the locality called 'La Ronde', which has been planted alongside the largely-forgotten native variety, Petit Bédan, which produces lively, light red wines which are great for blending purposes; and last but not least, carefully-selected Chardonnay from the vines at Grange Grillard.'
