## BOXLITE® - THE FINAL GOOD-BYE TO HAZARDOUS, PARAFFIN-BASED LIGHTS.

The air in restaurants can contain high levels of cancerous substances coming from paraffin-based candles, often at levels that exceed what many factories permit. Now Clean-Light HK Ltd introduces **BOXLITE®** - an environmentally-friendly alternative to replace candles and oil lamps in public and domestic environments.

In Sweden alone 300,000,000 tea candles are lit each year. In addition to the fumes caused by burning paraffin, the aluminium cup for each candle is disposed without mandatory policies of recycling. Clean-Light HK Ltd expects a future EU-directive to ban the use of paraffin-based substances in public environments. There is already a ban on candles, tea candles and oil lamps due to the fire hazard, and we believe that it is just a matter of time before the harmful substances emitted by these products are replaced by environmentally-friendly alternatives.

### **BOXLITE® is a cordless LED light source in a unique, customisable design for restaurants and cafés as well as home use.**

- A convenient and energy-efficient alternative to paraffin candles and oil lamps
- Designed with the latest LED and battery technology. A single charge provides up to 7 days of light.
- The four sides of the lamp are fitted with a UV-proof opal acrylic sheet that can feature decorative images or restaurant menus.
- Create your own design by choosing motifs from thousands of images available in the BOXLITE® image bank.
- Artists and designers can create their own BOXLITE® lamp and get paid for each lamp sold.
